Common Name Bean (Bush)			
Variety Name	Growth Info	Historical Info	Accession #
Borlotto Lingua Di Fuoco (Borlotto Fire Tongue)	Good for fresh and dried use, white pods streaked with red/orange. Beans are tan speckled with dark red. 50-60 days. High yielding variety.	Italian heirloom.	72
Canadian Wonder	Red kidney bean with a small white eye. Early as a snap bean, but primarily used as a dry bean. Very productive, smaller bush plant. 95 days to dry.	Listed in the Ely seed catalogue from 1881: "This dwarf bean is of such great value as to fully justify the name "Wonder". In growth the plant is dwarf and compact. The pods, produced in marvellous (sic) abundance, are very tender, delicate in flavor, of beautiful shape, and grow from 12 to 16 inches in length. For string beans it is sure to become a great favorite, while for fresh shelled beans (cooked like Lima Beans), hardly any other variety can approach it in rich, delicious flavor and handsome appearance." Believed to pre-date that, however no further documentation is verified. Canadian heirloom.	264
Ireland Creek Annie	Bush type bean, excellent for soups and dry uses. 24" growth. Good producer. 70-75 days.	English heirloom grown since the 1930s on Ireland Creek Farm in British Columbia.	204
Koala	Plant produces thin pods, plant size about up to 12".		293
Maggie (Magpi)	Bush-type bean. Reportedly later variety. Black and white speckled, slightly elongated bean.	Introduced by the Carter Seed Company from France in 1913 OR 1909 by Sutton Seeds (conflicting reports).	221
Monastery	54 days from sprout to green harvest. 89 days from sprout to dry harvest. Great for both uses, nice nutty flavour green. Great short season variety.	Likely originally Vermont Cranberry, but grown by the Trappist monks in Tracadie NS since the 1930's and now genetically distinct.	328
Morine	Amazing variety, does well in all kinds of weather (hot, wet, dry, cool). Abundant harvests of fresh and dry beans. Bush type with white flowers, some of which have a slight pink blush. 60 days for fresh, 90 days for dry.		338
Mrocumiére			332
Norwegian Brown	Plant produces good, early harvests of gold brown soup beans with a white eye. 75 days (dry). Should be a bush variety. Heavy yields.		262

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Pepa de Zapallo (Tiger Eye)	Amber yellow dried bean with maroon swirls. Best for dry use, thin skinned for easy drying on the vine. Bush habit. 80 days.	Originally from South American (reported).	302
Prince Purple			329
Speckled Algonquin	Dry bush bean variety, light tan and red speckled beans. 95 days to dry.	History is spotty at best on this variety.	211
Swedish Brown	Plant grows approximately 15" high, produces pods of brown beans used primarily for dry use.	Original seed was brought to Canada by Swedish immigrants who settled in Ladner, BC and Westham Island. Seeds originally brought in the 1800's.	209
Thibodeau du Comté de Beauce	Excellent short season variety producing excellent harvests of straight green beans dashed with purple early in the season. Bean in tan in colour with burgandy flecks. Produces well even in cool, wet conditions. 45 days for snap. 70 for dry.	Documented back to Comte de Beauce in Quebec. Old Canadian heirloom.	267

Common Name Bean (Fava)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Broad Windsor	75-85 days. Heavy production. Black and white flowers.	Stated in the Ely seed catalogue of 1881 to be the "celebrated Broad Bean of England". Originally coming to England from Portugal in the 1300's, and grown in North America since the end of the 18th century.	263

Common Name Bean (Pole)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Brecon Black	Tall, strong plants produce long green pods with black beans.	Brought to Ireland from Wales in 1945 by Dr. Robert Davies from Brecon, South Wales and grown in Ireland ever since. Donated to ISSA by Urusula Burke, a neighbour of the Davies family.	333
Cherokee Cornfield	Small beans range from black to olive to cream to salmon to white, with striking black markings.		218

Populuxe Seed Bank – All Current Holdings

Variety Name	Growth Info	Historical Info	Accession #
Emelia's Italian Pole	Extremely vigorous, 10-15 ft plants loaded with beans.	Emelia Fulla brought the seeds to Canada when she immigrated from Italy in 1911. She was from St Peitro, Udine, Italy. The name 'Aunti Vi' was given to it by Annette Barley, who was given the beans in 1965. Vi stands for "Vancouver Island". The bean has been grown around Nanaimo for over 100 years. In 2015 A Barley renamed the beans 'Emelia's Italian Pole' in honour of Emelia Fulla.	186
Gramma Walter's	Plant produces good yields of white and dark red mottled beans, used primarily for dry uses, but can be used fresh. Approx. 5 seeds per pod, light pink pod. Grows approx. 7 ft. tall. 60 days for fresh use, 80 days for dry.	Plant reportedly comes from the Pacific Northwest, although no history on Gramma Walter's can be found.	210
Grandma Nellie's Yellow Podded	Early maturing variety, 60-65 days. Moderately productive. Bean will start in colder soil, making it excellent for shorter and colder climates. Dry bean. Shatters when beans are ready.	Given to Nellie Chernoff, of Kamsack, Saskatchewan, by a Russian lady immigrant friend.	187
Irish Connors	Moderately large plants (approx. 6ft long), white flowers, pods are approx. 7-8" long with 6-8 beans per pod. Three pods per shoot. Beans are a chestnut brown colour and are good for snap and dry uses. Doesn't like high heat, does better in moderate temperatures. Early producer, ready for drying stage at only about 70-80 days.	Ken Connors was born in Ireland in 1898. His family immigrated to Boston, Massachusetts in 1900, and then again moved to New Brunswick, Canada in 1907. They made their way out west and settled in the Vancouver, BC area. The family is still around, but in the interior of BC now, where they run an antique store and still to this day grow these beans that followed them around their journey in North America.	134
May Flower	Best use as snap beans, but can be used as dry. Pods produce short squarish beans, off-white in colour flecked with a burgandy red that a cumulates at the eye. 100 days to maturity	Said to have been brought over with the Mayflower in 1620, however it shows a lot of resemblance to 'Colorado River Bean'. Might simply be a renamed variety.	115
Mr. Tung's	10" pods, 8-10 beans per pod. White/khaki colour, about 0.5" long. 7 pods per shoot, 99% fruit set. White flower, good dried and fresh, with a slight buttery flafour. 70ish days. Vines are 8-10ft long.	Heirloom originally from China, brought over by the Tung family when they moved to Longbeach, Kootenay Lake, BC.	74
Musica	Large flat pods 9-12" long, 6-8 beans per pod. White beans, about 0.5" long. 3 pods per shoot, about 85% fruit set. White flowers. Good dried and fresh. 60-70 days. Vines about 7-8ft long.	Spanish heirloom.	73

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Oma's	Large vining variety, vines approximately 10ft high. Huge pods, about 12" long produce large white beans (approx, 7-9 per pod). Good for fresh or dried use.	Original gardener that sent them to the bank said that her grandmother brought these beans over from Germany with her when she immigrated in the earlier part of the 20th century. They have been in her family ever since.	133
Oregon Giant	Plant produces large, flat pods and kidney-shaped beans. Beans and pods are tan with purple striping. Pods are 10" long with 8 beans per pod. Extremely large vines. 70 days for snap beans, 95-110 for maturity.	Thought to originate from the Pacific Northwest. Dated at least to the 1930's, as it was listed in the 1937 McFayden's seed catalogue.	113
Poltschka	8" pods, 6-9 beans per pod. Beans are smaller sized, about the size of a blackeyed pea. Colour is black/dark purple/blue. Excellent as a green bean or as a dried bean. Does moderately well in a hot climate, might produce better in a slightly cooler environment.		81
Speckled Cranberry	Triple purpose bean. Can be used as a snap bean at around 60 days, green shell bean at around 80 days, or as a dry bean if grown to full maturity. Produces heavy crops of stringless 7-9" pods until the first frost. Pole habit, dry, 60-90 days.	Brought to North America from England around 1825.	265
Sunset Runner	Plant produces distinct pale-peach blossoms, vines reaching up to 6ft. Best used mature, and said to be excellent for freezing and canning. Beans are large, and are black, flecked with lavender-purple. 75 days.		116
True Red Cranberry	Plant produces good harvests of beans that resemble cranberries - dark red in colour, and about the size and shape of cranberries. Mostly used dried. 95 days.	Said to be originally used by the Abnaki First Nations of Maine, USA.	117

Common Name Bean (Runner)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Scarlet Runner	Green heart-shaped leaves with bright red flowers, produce black and dark purple seeds. Edible when young. 75 days fresh, 115 dry.	Wild perennial in tropical Central America, introduced to cultivated gardens around 1750.	217

Common Name Cotzmatl

Populuxe Seed Bank – All Current Holdings

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
	Sprawling plant produces small 1" orange fruit in a husk. Earthy/fruity kind of flavour. Does well in heat, sets fruit easier in hotter weather. Doesn't like to be too damp. Tender perennial - will tolerate some frosts, but successive hard frosts will kill it.	Rare plant, reportedly grown by the Aztecs.	175

Common Name Cucumber

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Fin de Meaux			340

Common Name Eggplant

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Rosa Bianca	Round, light lavender fruit with a delicate flavour. Best picked when they are 6-8" long. Meaty. 75 days.	Italian heirloom.	268

Common Name Ground Cherry

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Cossak Pineapple	Similar size and growth of 'Aunt Molly's' but with a pineapple flavour. Self seeds readily, versatile plant, grows well in ground and in containers (but better yields if in-ground). Fruit is about 1/2" in diameter. 70 days.	Said to originate from Eastern Europe.	112

Common Name Pea

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Blue Pod Capucijners (Blue Podded Pea)	Ornamental/edible variety, bright blue/purple pods from silver-grey vines that grow approximately 8ft. Excellent pea for eating the pea pods, fresh shelled pea, or dried pea. 80-85 days	Developed by the Capuchin monks in Holland. Known to date at least pre-1800.	84
Chinese Giant	Plant produces very large, 5-8" pods used for fresh snap pea use. Approximately 6-8 peas per pod. 4 ft. vines. Grows very well on the prairies.		212
Monk	Rough brown in appearance, used almost exclusively for dry purposes.	Traditional variety from the monks in the Netherlands.	118

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Robinson	Tall (7ft+) plants produce long slim pods with up to 11 peas per pod. Wrinkled seed, stays sweet even when quite mature.	Donated to HSL by Michael Stanley who has grown the variety since the 1950's. M. Stanley originally received the seed from Mrs. Robinson, who acquired the seed originally from Scotland.	336
Slocan Snow	Large 7ft vines, prolific producer. White flowers. Leaves are green with white splotchy-dot variegation. Does very well in high heat. Excellent for snap pea use, as well as letting mature on the vine to use for dried peas. 50 days for fresh use, 70 for dry.	Heirloom brought by Japanese immigrants (possibly internment camp prisoners?) during WWII to the area. Originally from Japan.	75

Common Name Pepper (Hot)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Aji Chinchi Amarillo	Smaller version of the Aji½ Amarillo. Yellow fruit, maturing to a deep orange. Mild to medium heat. Excellent for fresh or dry use. 85 days.	Traditionally from South America, heavily used in Peruvian dishes.	224
Chocolate Habenero	Plant produces chocolate brown lantern shaped fruit, about 2" long. 300,000 scoville units, very spicy, and with an excellent smokey/fruity flavour.		111
Czech Black	Pepper matures from black to red. Jalapeno in heat, nice big plants, ripened very early. Fruit is approximately 3" long, about 1.5" in circumference.	Czechoslovakian heirloom.	330
Hinkelhatz	Small, 1-2" long red peppers, roughly shaped like a chicken's heart. Bushy rather than upright growth habit, great for containers. Spicy. 85 days.	Grown by the Pennsylvania Dutch since at least the 1880s. Hinkelhatz translates from Penn Dutch to "chicken heart".	315
Morocco	Sweet but gently hot chili. Up to 3-inch three-lobbed boxy hot and sweet chilli pepper that turns brilliant red when ripe. Plants grow to 3 feet in height. Does well in a greenhouse border or pots.	Found by Adam Alexander in SE Morocco close to Algeria in 1997, and donated to HSL.	337
Serrano	Very early serrano variety - it was just labelled as serrano from the greenhouse, but the peppers are on the hotter end of what would be considered standard for a serrano, and it is much earlier than other serranos I've grown.		578

Common Name Pepper (Sweet)

Populuxe Seed Bank – All Current Holdings

Current To: January 22, 2023

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Jimmy Nardello's (Jimmy Nardello's Italian)	Excellent production of long, red peppers. Sweet, rich flavour. 75 days.	From Baker Creek Heirloom Seeds: "This fine Italian pepper was grown each year by Giuseppe and Angella Nardiello at their garden in the village of Ruoti, in Southern Italy. In 1887 they set sail with their one-year-old daughter Anna for a new life in the U.S. When they reached these shores, they settled and gardened in Naugatuck, Connecticut, and grew this same pepper that was named for their fourth son, Jimmy."	579

Common Name Squash (maxima)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Brode Galeux d'Eysines	90 days. Warty winter variety. Very rare, difficult to find.	French heirloom.	183

Common Name Squash (moschata)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Musquee De Provence	Large, flat 10-15lb fruit that are deeply divided. Mature to a deep dusty orange. Flesh is dense and rich. Good for roasting and pies. Good keeper. 100-110 days.	Heirloom to southern France where, until recently, it was though the variety had become extinct.	219

Common Name Squash (pepo)

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Tatume	Extremely vigorous vining summer squash, best when eaten young as a summer squash (medium to dark green), but can be left to mature on the vine and cured to keep as a winter squash for several months (golden yellow). For eating like a zucchini, harvest is at about 45-50 days, for mature it's about 80 - 90 days. Excellent flavour, very firm. When cured as a winter squash it's reminiscent of spaghetti squash. Needs lots of room to grow, does well with trellising.	Historical Mexican variety.	140

Common Name Tomato

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
African Beefsteak	80-90 days(?). Non-uniform pink fruit, 6-14 oz. Good flavour. Moderate production. Regular leaf. Indeterminate.	Commercial OP variety.	345

Populuxe Seed Bank – All Current Holdings
Current To: January 22, 2023

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
African Vining	Pink oxheart shaped fruit. Very meaty and few seeds. Nice sweet flavour, 4-14 oz each. Rapid growing vine. Wispy, RL. Indeterminate.	First offered via SSE in 2007.	346
Agona Local	Compact, semi-determinate plant produces excellent crop of 2-6 oz juicy plum type fruit. Excellent for fresh eating and sauces. Delicious full flavour. Approx 70 days.	Seed donated to PGRC by a Mr. Agble in 1989. Variety originally from Agona, Ghana	170
Ailsa Craig	Good production and good flavour from small 1.5oz round or slightly elongated red fruit. Clusters of 6-8. Regular leaf. Indeterminate. 75 days.	Bred by Alan Balch from a cross of Fillbasket and Sunrise, and introduced in 1912 by the seed vendor Alexander and Brown of Perth, Scotland.	259
Al's Black	Plant produces medium sized, firm black fruit. Early production.	Grown in Saskatchewan in the same family for several decades. Further information is unknown.	242
Alberta White	Nice, compact erect plants produce very good harvests of mild, yellow/white oblate fruit roughly 150g on average. Good production and good fruit set, produces well up until frost. Regular leaf. Indeterminate. 72 days.		582
Alesha Popovich (Aloysha Popovich)	Compact indeterminate. Red oblate fruits with ruffling. 4-8 oz each. Heavy producer. Regular leaf. Indeterminate.	Russian commercial variety, introduced in early 2000s. Named after the famous bogatyr.	347
Altajskij	Red, oblate, pleated fruit. Large plant, good production. Indeterminate. Good fruit set. Regular leaf.	Donated to PGRC in 1986.	312
American Beauty	Red to pinkish red fruit. Round to slightly flattened in shape.	Reportedly comes from the early part of the 19th century.	419
Americke Pyramidni			169
Amish Salad	75-80 days. Small, pink ovular fruit. Approx. 1 oz each. Firm flesh and large seeds. Mild, sweet flavour. Regular leaf. Indeterminate.	Family heirloom from USA. First offered in SSE in 1993 by Carolyn Male.	348
Ananas Noir (Black Pineapple)	Very meaty beefsteak fruit. Black streaked with green shoulders. Very creamy inside, cannot be kept long after picking. Good flavour, sweet with mild acid undertones. Regular leaf. Indeterminate. 85 days.	Appeared in a 'Pineapple' tomato patch and was developed and stablized by Pascal Moreau, a horticulturist in Belgium. First introduced to SSE in 2003.	2
Andrina Dwarf	Small cherry tomato, plant reaches on 6" high and can be grown in a 6" pot. Good yields of tiny cherry tomatoes, round and red. Heat delays production. Regular leaf. Determinate. 60 days.	Reportedly originally from Russia.	3

Variety Name	Growth Info	Historical Info	Accession #
Anna Russian	Plant produces good flavoured red, heartshaped fruit, good for canning and slicing. Fruit weighs 5-17oz each. RL, indeterminate, 75-80 days.	Original seed sent to Craig LeHoullier in 1989 by Brenda Getty Hillenius of Corvallis, Oregon. She received the variety from her grandfather, Kenneth Wilcox. Kenneth received the seeds from a Russian immigrant in the 1980s, who was sent the variety by his family, who lived in Russia. Craig LeHoullier introduced it to the SSE Yearbook in 1989.	291
Antonovka	Kind of spindley plant, didn't seem to like the cold, wet weather of a La Nina year, but did take off once weather warmed up. Excellent flavour, oblate beefstake type fruit. Dark red with darker red/brownish/greenish shoulders. Good balance between rich and tart taste. Indeterminate. 75-80 days. Regular leaf.	Seed donated to PGRC in 1984 from Ontario.	121
Apfelsin (Apfelsin Orange, Apelsin)	Good yields of 5-8 oz orange fruit. Good balanced flavour. Good keeper. 80 days. Indet, reg leaf.	Means orange in Russian. Of Russian origina. First introduced in SSE in 1999 but Ake Truedsson (Sweden).	349
Armenian	1lb bi-coloured oblate fruit with yellow/orange skin and flesh. Slight red marbling sometimes in the flesh. Beefsteak-type fruit.	Originally from Armenia, as per Charlotte Mullens of West Virginia, who was the original source of the seed in 1990. Regular leaf. Indeterminate, 75.	4
Ashleigh	Large red beefsteak fruit, up to 1 lb. Few seeds and very meaty. Good flavour. Low to moderate production (?). Fruit can be irregular and ruffled. 80 days. Regular leaf. Indeterminate.	Neil Gillard from Ontario, Canada (ONT GI N) got the seed from friends at Wilber Lake, Ontario, who in turn got it from their neighbour. This variety originally came unnamed from Lazec, Macedonia, and Neil decided to name it after his niece Ashleigh.	350
Auntie Madge's (Auntie Madge's Plum, Aunt Madge's Plum)	Tall, vigrous plants. Produces large trusses of oval-shaped red cherry fruits. More acidic than sweet, very juicy, and few seeds. 70-80 days. RL, indeterminate.		351
Auriga	Deep apricot fruit with orange interior. Fruit approx 2.5" in size. 75 days. Regular leaf.	Reportedly from Switzerland	200
Aviuri	Red fruit with orange/bronze striping. 4-6oz fruit. Regular leaf. Indeterminate. 78 days.		152
Azoychka (Azochka)	Good sized 6-12oz fruit, moderate production in high heat. Lemon yellow, very non uniform. Indet., RL plant. Likes to vine upwards. Very sweet, fruity and low acidic flavour. 75-80 days.	Russian heirloom, 'Azochka' was a common Arabic female name in Russian in the mid-20th century.	5
Baby Russian	Small brown/black red fruit, 30-80g each. Compact plants. RL, determinate, midseason.		520
Backfield (Back Field)	Early semi-determinate. Red oblate fruit, approx 280-340 g each. RL, 65 days.		352

Variety Name	Growth Info	Historical Info	Accession #
Barnaulskiy Konservnyi	Heavy yield of red elongated plum variety. 3-4 oz sweet fruit. 65 days. Regular leaf, indet.	he name means 'a canner from Barnaul', where Barnaul is a city and administrative center of the Altai region in Russian Siberia	353
Barnes Mountain Yellow	Smooth orange beefsteaks, meaty flesh and good sweet flavour. 8-18 oz. Late, 90+ days. Indet, RL.	A Kentucky heirloom from Barnes mountain in Estill county.	354
Beauty King	Large, oblate beefsteak type fruit non uniform in shape. Bicoloured red and orange with yellow flesh. Reported 1 large (1lb) fruit, rest will be smaller. Regular leaf, indeterminate, 83 days.	Most likely sport from 'Big Rainbow', and may not be entirely stable. From Brad Gates of Wild Boar Farms.	6
Belgian Pounder	Red, oblate, beefsteak type fruit. Approx. 1lb each. Sweet/acidic balanced flavour. Production may slow in hot weather. 70-80 days. RL, indeterminate.		355
Berkeley Tie-Dye Heart	Compact plants, 6-8 oz red heart shaped fruit with green stripes. Meaty flesh, few seeds. Good flavour. Regular leaf, indeterminate, late - 85+ days.	A stable unknown cross that arose in the fields of Bradley Gates of Napa, California. Mutation from Berkeley Tie-Dye.	356
Beuteltomate aus El Salvador	Pear shaped ribbed tomato. Late season. Yellow/orange. Regular leaf.		357
Bielo Russian	Round red, slightly oblate fruit. 2-4 oz. Determinate, RL, mid season.	Possibly the same as Belarusian Early?	358
Bigguns			420
Big Month	Red. Paste/canner?		359
Big Zebra	Green beefsteak/oblate fruit with red striping. Late, indeterminate, RL.	Found in a patch of 'Copia' tomato, introduced via Tomato Grower's Supply in 2001. Potentially still unstable.	421
Black From Tula	RL, indeterminate. Very flavourful, earthy, acidic, yet somewhat sweet complex flavour. Big heavy 3" diameter fruit. Family heirloom from Ukraine. 80 days.	Family heirloom from Ukraine. This variety was imported from Russia (Marina Danilenko) by Seed Savers Exchange and offered in the SSE 1996 Yearbook	9
Black Giant (Tchyorny Gigant, Cherniy Gigant)	Compact plant, purple-black globular fruit with green ruffled shouldering. 4-12 oz fruit. Some cracking. Good flavour. Regular leaf, indeterminate, 65-80 days.	Russian origin.	360
Black Krim	Large 8-16oz fruit, dark purple/brown/black with darker shouldering. Excellent flavour. Regular leaf. 80 days.	Ukrainian heirloom from Crimea region of Black Sea (Ukraine). First offered in the USA in the SSE catalogue by Lars Olov Rosenstrom of Bromma, Sweden in 1990.	223
Black Mystery	8-12 oz oblate dark red/black fruit. Smooth skin. Juicy. Production suffers in high heat. 70-80 days. Regular leaf, indeterminate.		361
Black Oxheart			320

Variety Name	Growth Info	Historical Info	Accession #
Black Pear	Medium sized potato leafed plants produce good yields of brown-black pear shaped fruit (about the sized of a small pear). Nice smokey flavour, slightly acidic, and not very sweet. Some slight green shouldering. No cracking or splitting, even under drought conditions. Not a dry tomato, but still makes a nice sauce. Good for fresh eating. Indeterminate. Potato leaf. 75-80 days.	Suzanne Ashworth located the seeds in Moldova.	79
Black Plum	Plum shaped mahogany/black fruit. 2" in diameter, very productive, with good flavour. 2oz fruit. Regular leaf. Indeterminate, 75 days.	Russian variety acquired by Seed Savers Exchange in the early 1990s from Marina Danilenko of Moscow, Russia.	10
Black Sea Man	Hearty determinate plant, approx. 3-4ft high. Produces good yields of black/brown fruit with excellent flavour. Good to excellent yields. Potato Leaf. 75 days.	Russian origin	167
Bola Macizo	Meaty dark pink/red fruit. Good flavour.	Name translates to "solid ball" from Spanish.	207
Bonito Ojo	Uniform 2.5oz, 2" globe-shaped fruit. Very sweet. Produces in trusses of 7-9 fruit. Very good production. Thin skin. Regular leaf. Determinate. 75 days.		230
Bononiya	Red fruit, 180-200 g each. Firm, smooth and uniform. Determinate. RL.	From Bulgaria.	362
Bramki	Red oblate fruit, up to 1lb. Good heat tolerance, good tomato flavour. Regular leaf. Indeterminate. 75 days.	Heirloom of Polish origin.	12
Brandywine, Red			317
Brandywine (Maylor Roth's)	Rare selection, light orange fruit. Beefsteak type with some ridges. Regular leaf. 80 days.	History is unclear - might not actually be related to Brandywine.	239
Brazilian Beauty (Brazilian Beauty Beefsteak)	Tall plant with dark green foliage. Medium sized green fruit - smaller than a beefsteak. Smoky flavour, high yields. Some reduced fruit set in higher temps. 70-80 days. Regular leaf.		341
Buffalo Heart	Large plants that yield lots of 16 oz., pale rosy pink, buffalo heart-shaped fruits with firm flesh and packed with good flavor. 75 days. Indeterminate. RL.	Seed sent to Gary Isben (of TomatoFest) from a family in Poland.	574
Buggy's Cherry			363
Bunte Pflaume	Tall plant produces small to medium sized (2-6oz) green/black bicoloured fruit that are beefsteak shaped. Very good flavour, does not keep well.	May not be original, as they are not plum shaped. Name means 'Colourful Plum' in German. May not be stable.	278
Burgundy Traveler	Mid season pink fruit. Regular leaf, indeterminate. Globular in shape.		364

Variety Name	Growth Info	Historical Info	Accession #
Bursztyn (Bärnsten)	Very early, compact plant. 2-4 oz yellow-orange fruit. Sweet taste and high yields. RL, indeterminate. 60-70 days.	Originally from Poland, and brought to USA in 1992.	365
Butterworth's Potato Leaf	Pink, 1 lb beefsteak-type fruit. Good flavour. PL, indeterminate, 85 days.		366
Calabacito Rojo	Plant yields excellent amounts of oblate, heavily ruffled fruits that are pinkish/light red in colour. Excellent sweet taste. Is said to do well in hot climates. Regular leaf. Indeterminate. 75 days	According to William Woys Weaver, it is a documented very old heirloom in Philadelphia gardens (1795) (cannot find direct documentation of this however). Seed was collected in Chiapas State (Mexico) in 1991.	149
Canabec Rose	Red, globular fruit. RL leaf, determinate. Midseason.	From Quebec, Canada (1976), bred by Roger Doucet, Station Provinciale de Recherches Agricoles, St.-Hyacinthe.	367
Canadian Dwarf	Good producer, although later for a smaller determinate plant than one would expect. Nice blemish free fruit with classic tomato flavour. I grew this one in a 5 gallon pot, and think it would produce even better in-ground. Approx 3 lbs per plant.	First offered in SSE 2007 yearbook by Michael Gunn of Pasadena, TX, USA, who originally received the seeds from Jennifer Hutson of Kingston, Ontario.	323
Canadian Heart	Compact, bushy plants. Blunt red heart-shaped fruit. 1lb each, meaty and tasty. Does better in a moderate climate without high heat. 70-80 days, RL, indeterminate.	Canadian origin?	368
Castell Nou			369
Castle Rock (Castlerock)	Early productive variety. Red 100 g fruit. Determinate.		370
Ceylon	Red oblate fruit with pronounced ribbing. Approx 2-2.5" in diameter. Juicy with good acidic flavour and productive. RL, indeterminate. Early to midseason.	Introduced in 1997 by Tom Stearns of High Mowing Organic Seed Farm. Tom received the seed from Bryan Connolly of Mansfield Center, Connecticut. Very similar to Red Calabash.	371
Chapman Special	Large pink beefsteak-type fruit. 8-14 oz each. RL, indeterminate. Midseason.	http://tatianastomatobase.com/wiki/Chapman_Special Original seed from Frank Chapman of Greenwich, OH, USA who has been working on this selection for 56 years.	372
Charlie's Green	Great tangy/fruity flavour, nice strong plant. Resistant to cracking and splitting, even during downpours and irregular moisture levels. Some fruit is more smooth while others will be quite irregular. Regular leaf. Indeterminate.		324

Variety Name	Growth Info	Historical Info	Accession #
Cherokee Purple	Plant produces brown/black/purple 6-10oz smooth fruit with green shoulders. Highly prized for its flavour, only moderate production. 85 days. Regular leaf. Indeterminate.	Cherokee Purple was sent to Craig LeHoullier by John D. Green of Sevierville, Tennessee, in 1990 as an unnamed variety. The original letter sent with the seeds that describes all that is known of its history is referenced here [1]. Mr. Green got the variety from a woman who, in turn, received them from her neighbor. The neighbor claimed that they have been in their family for 100 years, originally receiving them from the Cherokee Indians. Craig named the variety and listed it in the SSE yearbook the year after he first grew them (1990). He also sent seeds to Southern Exposure Seed Exchange, then, a few years later, Johnny's Selected Seeds.	216
Chezven Gigant			422
Chianti Rose	Vigorous vines, good production of 8-20 oz pink, irregular oblate fruit. Good flavour. Potato leaf. Indeterminate. 85+ days.	A stabilized cross between an unknown variety and Brandywine.	373
Chio Chio San	Red plum/ovular fruit. RL, indeterminate, midseason	Russian commercial variety.	374
Chocolate Stripes	Fair production of large, 8oz mahogany bicoloured fruit that is heavily striped with dark green. Good flavour, will split with inconsistent watering. Regular leaf. Indeterminate. 75 days.	Developed by John Siegel of Covington, Ohio, from a cross between Schimmeig Creg and a pink beefsteak. Introduced to SSE by Al Anderson of Troy, Ohio (OH AN A) in 2007	145
Chocolate X (PSB-4)	Round, spherical fruit on a hardy plant. Yellow skin and flesh. Regular leaf. Approximately 75 days. Very good flavour.	Natural cross found in my garden in 2015 - sprung up between where a yellow pear and a Chocolate Stripes was, so I believe those are the parents.	301
Chucklahoma Orange Banana	Unknown if this is the same variety as 'Orange Banana'.		375
Church	Large pink fruit, 1lb each. Good flavour, meaty and sweet. RL, indeterminate. 80-90 days.	Heirloom from the Church family of Hot Springs, VA, seed collected by Jack Schaeffer.	376
Ciudad Victoria	Currant tomato. Large, sprawling plants Small red fruit. Sweet. Late season.	from dooryard gardens in Ciudad Victoria, Tamaulipas, Mexico.	383
Clear Pink Early	Plant produces excellent harvests of 3-6oz pink fruit, with a good sweet flavour. Juicy, resistant to heat. Spherical or slightly elongated shape. 60-70 days, RL, determinate. *** my seed was much later, heat delayed production, but production was still very good. Ripened well off the vine in a cool location after frost.	An old Russian variety, introduced to SSE in 1995 along with Cosmonaut Volkov Red. The original Russian name was lost.	297

Variety Name	Growth Info	Historical Info	Accession #
Clover Trefle (Togo Trefle?)	Grow out to verify this is Togo Trefle and not a different variety. Small red ruffled fruit, 1-2 oz. Good flavour, early production. RL, indeterminate.		377
Colorado Grueso	Oblate bi- or tri- coloured fruit with an uneven pleated shape, smallish plant, but indeterminate. Early maturing.	Collected originally from Argentina by the USDA in 1937, then obtained by a collector in Alberta, and ultimately donated to PGRC in 1967.	176
Con's Italian			378
Coracao di Boi	Red oxheart variety, large plant with wispy regular leaf foliage. Good balanced flavour, excellent for fresh, cooking, and canning uses. Average fruit weight about 10oz, 3" in diameter. Irregular watering produces some radial cracking. Loves hot weather, suffers a bit in cool, wet weather. 80 days. Regular leaf. Indeterminate.	Very rare, heirloom Portuguese variety. Portuguese name literally translates to "heart of the ox".	16
Cotelee de Genes (Costoluto Genovese)	5-7 oz round oblate fruit. Good full flavour. RL, indeterminate. Midseason.	Originally from Italy, first offered in SSE in 1995. Original seed obtained from France in 1992.	379
County Agent	Plant produces good harvests of irregular/pleated red fruit, 6-16oz each. Good flavour, hot weather delays ripening. RL, indeterminate, 80 days.	Seeds originated from an Oklahoma County Agent.	296
Coyote	Large, sprawling vines produces prolific yields of yellow . 5" fruit, approximately 1-2gr each. Regular leaf. Indeterminate. 70 days	Wild variety from Mexico.	172
Creole	Uniform and smooth pink/red fruit. Early production.	Collected from Georgetown market, Guyana, Oct. 10, 1934.	154
Crimson Cushion (Henderson's Crimson Cushion, Red Ponderosa, Red Beefsteak)	Large red fruit, weighing up to 2lbs, but more commonly about 9 oz. No core or shoulders and good texture. 85 days, RL, indeterminate.	Originally released in 1894 by Henderson's Seed Company. Original strain of Red Beefsteak.	381
Crimson Delight	Pink 8-10 oz fruit, some reaching up to 1lb. Good flavour. High heat may lower production. PL, indeterminate, 80 days.	Missouri heirloom reported dating back to the 1840s.	382
Cuban Black	Produces good yields of 6oz, oblate brown/dark red fruit. Some fruit heavily ribbed, while others are smoother and more uniform. Good flavour. Regular leaf. Semi-determinate. 75 days.	Russian variety. Original seed obtained from the former USSR.	234

Cuostralee	85 – 90 days. Indeterminate. Heavy set of 2 pound, slightly oval, blemish-free fruit. Greatflavour, one of the best red tomatoes you'll ever taste.	It is a French family heirloom obtained by Craig LeHoullier and Carolyn Male in an extensive sharing of seeds in 1992 with Norbert Pairerra of Hellimer, France. Mr Pairerra sent Craig and Carolyn letters with a handwritten list of hundreds of varieties of French named OP tomatoes. They selected those that sounded most interesting, and growouts started the season after they were received.	95
Cuyano	Small to medium oblate fruit. Some smooth some slightly ruffled. 4-6 oz each. RL, indeterminate, mid-season.	Commercial heirloom. Described in Gleckner seed catalogue in 1958, and developed by Prof. Abelardo Piovano at the National University of Argentina.	384
Czarnogotowki	Oblate pink beefsteak-type fruit. 10-18 oz each, good producer. RL, indeterminate, 80 days.	Polish heirloom.	385
Czechoslovakian			386
DaCosta's Portuguese	Ind. RL plant. High yield of ribbed light pink fruit, approx. 1lb ea.	Named by Dan & Val McMurray. They picked the seeds from a sandwich in Portugal.	193
Delice d'Or	High yield of golden yellow medium sized fruit. Slightly flattened, 4-8 oz with good flavour. Large plant, RL, determinate.		388
Delicious	Large, meaty scarlet red fruit with few seeds on a regular leafed plant. This particular variety still holds the Guinness Record for largest tomato (at 7lbs), although fruit is much more likely to be in the 1-2lb range. Fruit can vary between globe-shaped and more irregular ribbed-shape. Resistant to cracking. Indeterminate, 85 days	Introduced by Burpee in 1964 after years of selection from 'Beefsteak (Crimson Cushion)'.	17
De San Juan			387
Detenicke Salatove	Plant produces uniform, red globular fruit. Dry flesh, good for a sauce or fresh eating. No cracks at all. 75 days. Regular leaf. Determinate.	Donated to PGRC in 1984 by Smithfield Experimental Farm in Trenton, ON.	123
Dikaya Roza (Wild Rose Red)	Pink beefsteak type fruit, 250-450g each. RL, indeterminate, late season (85+ days)	Moldovan variety, developed by Pridnestrovian Agric. Res. Institute.	557
Dingwall Scotty (Ding Wall Scotty)	Narrow, upright, heirloom plants producing clusters of 3 to 4, 2-inch, round, red tomatoes with rich flavors and just the right touch of acidity. Regular leaf. Indeterminate. 75 days.		18
Don Juan	Deep pink fruit with pale yellow striping, firm oval paste-type tomato, about 5cm in diameter. Plant reaches 2-5" high. Rugose leaves. Determinate. 75 days.	Commercial open pollinated variety from Russia.	104

Variety Name	Growth Info	Historical Info	Accession #
Donskoi	Large red heart shaped fruits, approx 13-16 oz (largest at 2lbs). Good flavour.		206
Dorothy's Big Mennonite Heart			389
Douame Egpa (Bulgarian, Douama Egpa)	113-226 g globe-shaped red fruit. Regular leaf, indeterminate. 80 days.	Bulgarian origin.	390
Doubloon			391
Dr. Lyle	Large pink beefsteak-type fruit. Irregular shapes, reportedly up to 2lbs each, but most around 10 oz. Rich flavour. Regular leaf, indeterminate, 80-85 days.	Family heirloom, introduced by Carolyn Male to SSE in 1996. Original seed from George Korbel of West Virginia, USA.	394
Dr. Wyche's Yellow	Large irregular deep yellow/orange fruit. Pomegranate shape inside, full of cavities. Sweet, fruity, juicy, very flavourful and delicious. Heat resistant. Large beefsteak type fruit. 85 days. RL, indeterminate.	Originally from Dr. Wyche, who owned a circus and bred this tomato.	19
Dubrava	Very sturdy strong plant, does well in high heat and cooler temps. Delicious 2-4" red oblate fruit, very tangy - they tasted like they've already been salted. Determinate. 72 days. Regular leaf.	Russian commercial variety. First offered in the Seed Savers 2007 Yearbook by Val and Dan McMurray of Wynndel, BC, Canada (B.C MC D), who got seeds from Natalia Ochagova in Michigan.	132
Duggin White	White, flat beefsteak-type fruit. Mild, sweet flavour, and good yields. RL, indeterminate, 80 days.	Grown by Lloyd Duggin, who originally received them as an unnamed variety. Further history is unknown.	393
Dutch Sweethearts	Large cherry sized heart		424
Dwarf Wild Fred	Plant produces excellent harvests of black/purple beefsteak-like fruit with excellent flavour. Fruits are 6-12oz fruit, rich and smokey flavour. RL (rugose), indeterminate, 70 days.	Developed in the 2006-2011 by the members of the Dwarf Tomato Project from a cross between Carbon with New Big Dwarf made in 2006 by Bruce Bradshaw, and named Sleazy. his variety was selected and named by Craig LeHoullier after his father Wilfred, from a humorous misspelling of his name in a church bulletin. First offered commercially by Tomato Growers Supply in 2011.	288
Early Kus Ali	Small to medium sized plant, oblate fruit. Mid season production.	Obtained at the Botanical Garden, Peiping, China, Feb.24, 1931. Donated to USDA in 1931	162
Early Maturing Siberian	Most likely a descriptor name, rather than the true one. Requires grow out to see if it can be matched to a known variety. Might possibly be 'Siberian'?		396
Eclairer (Eclairer?)			397

Populuxe Seed Bank – All Current Holdings

Current To: January 22, 2023

Variety Name	Growth Info	Historical Info	Accession #
Egg Yolk	Plant produces bright yellow cherry-sized fruit, approximately the colour and size of an egg yolk. Reportedly heat tolerant. Large vines. RL, indeterminate. 75 days.	Developed by Larry Pierce of Missouri from a sport he found growing in his garden in Moldovan Green tomato patch.	294
Eiförmige Dauer	Ind. PL. Pink, oblate fruit, growing in clusters of 6-7. Fruit weighs approx 2-4 oz ea. 80 days.	Heirloom from Germany. Introduced to North America by Reinhard Kraft.	191
Ei Von Phuket (Egg from Phuket)	High yields of small pink egg-shaped fruit in clusters of six. Ripens from white to raspberry pink. 25 gr. RL, indeterminate. Mid-season.		398
Eli	Good yields of 8-12 oz red fruit. Good flavour. Plants are less robust in high heat. PL, indeterminate, 80-85 days.		399
Elizabeth	Produces red tomatoes, 2 oz uniform fruit. Very large, strong plants, requires heavy staking. Excellent in a greenhouse.	A family heirloom from Mike Stefancsik.	237
El Nano	Excellent sturdy plant, grows about 3-3.5ft high. Early producer of medium sized red pleated fruit. Fruit is extremely tasty, an excellent sweet flavour with a full body. One of the best tasting reds I've had! Seems to do well in cooler and higher temps, it was the first to produce in a La Nina year on the coast. Started flowering again near the end of the season when it had warmed up quite a bit. Excellent production, would be good for shorter seasons, and containers. Regular leaf. 68 days.	Original seed acquired by PGRC from from a market in Argentina in 1965.	131
Elso Termes	Determinate, red fruit. Regular leaf. Early maturity.	Donated to PGRC in 1983.	308
Esther's Cherry (Auntie Esther?)	Yellow cherry tomato. Good flavour. RL, indeterminate. 75 days.		401
Evalena's Roma			402
Eva Purple Ball	Plants produce pink spherical fruit with sweet flavour. RL, indeterminate, 70 days.	This variety was brought to the U.S. from the Black Forest region of Germany in the late 1800s by the family of Joseph Bratka of Elmwood Park, New Jersey.	270
Fantome du Laos (Ghost of Laos)	RL , indet. Plant produces large yields of 6-12oz pale yellow/white fruit. Flavour leaves a lot to be desired, but it's an interesting history and interesting to look at. Very pretty. Good keeper, which is also a bonus, can be kept several months under the right conditions. 80-85 days.	There's a fable with this tomato: when it glows fluorescent green, tomatoes are afoot. As the name would suggest, it's thought to originate from Laos.	21
Fargo (Fargo Yellow Pear)	Fruit is similar to 'Yellow Pear' in size and shape - but reportedly grows on a shorter vine while producing the same amount of fruit.	Commercial heirloom variety, introduced by McFayden's in 1937.	105

Variety Name	Growth Info	Historical Info	Accession #
Ferris Wheel	Good production of large, pink oblate beefsteak-type fruit, on average ranging 12-16oz (occasionally up to 32 oz). Slightly sweet, rich flavour. Regular leaf. Indeterminate. 75-80 days.	Originally introduced to the market by Salzer Seed Co. in 1898.	139
Feuerwerk	Plant produces red fruit with yellow mottling/stripes, 4-7oz fruit with a globe shape. Good flavour. 85 days. Regular leaf.	Heirloom from Germany. Translates to "firework"	245
Flamingo	Pink, globular fruit. RL, determinate.	As per Baker Creek Seed Catalog, it appeared in a patch of Mountain Spring tomatoes, and it was selected and stabilized by a produce grower of the Delano, Tennessee, Mennonite community.	403
Floche			404
Forme du Coeur	Plant produces red heart-shaped fruit, medium sized. Meaty fruit. RL, determinate, 65 days.	From Quebec. Potentially 'Quebec 473', bred by Roger Doucet, of Agri-Food Canada. Detailed info: https://potagersdantan.wordpress.com/2011/01/24/la-tomate-forme-de-coeur/	290
Frank Black			405
Frisco Cherry	Red currant-sized fruit, good sweet flavour. Good resistance to late blight. RL, indeterminate, mid season.	First offered in the Seed Savers 2007 Yearbook by Al Anderson of Troy, Ohio (OH AN A), who received the seed from Peter Gallant of Charlottetown, Prince Edward Island, Canada.	406
Frühe Liebe (Early Love, Early Love of Quedlinburg)	Very early, 4-5' plant, produces 2-4oz red heartshaped fruit. Mild sweetness. Indeterminate, potato-leafed, 50-60 days.	Variety from Quedlinburg, saved by IPK Gaterleben.	83
Fryerfrins Borghese	Extremely hardy plant, excellent producer even in not great conditions. Produces dusty-red round uniform fruit approx. 2" in diameter. Good for fresh uses. Regular leaf. Indeterminate. 75 days.	Donated to PGRC in 1984.	129
Gajo De Melon	Very sweet, slightly irregular sized cherries, up to 1 oz. Pink/gold bicoloured exterior and interior with a fruity flavour. RL, indeterminate, 80 days.	Similar to several other bicoloured cherries - possibly a renamed version of one of these (Isis Candy, Marizol Magic, Bi-color Cherry, etc.)	407
Gardener's Delight (Sugar Lump)	Medium sized cherry fruit, red, acidic and "old-time" tomato flavour. Indeterminate, RL, will bear until frost. Produces in trusses. 70 days.	Bred by Paul Tellhelm and introduced in 1950-1951 by Ernst Benary Samenzucht (formerly of Erfurt, East Germany; now Hann Muenden, Germany). It was named "Benary's Gartenfreude, Hochzucht". * Offered commercially by Jung Quality Seed, Randolph, Wisconsin in 1960 as Jung's Sugar Lump.	22

Variety Name	Growth Info	Historical Info	Accession #
Garden Lime	Medium sized plant produces heavily bifurcated fruit, very irregular. Fruit is a medium green colour, edging into yellowish tints when ripe. Approx. 8oz per fruit. Juicy, and very tasty, one of the best tasting green varieties with a very full flavour. Does better when it doesn't receive too much water, doesn't like cold weather a lot. No cracking or splitting. 80 days. Regular leaf. Indeterminate.	Donated to PGRC by a German source in 1992.	127
Garden Peach Red (Red Garden Peach)	Similar to 'Garden Peach', but fruit produced is red. Fuzz all over the skin, about 2" in diameter. Mild flavour. RL.		408
Garten Freude	Bushy, sturdy medium sized plant. Needs hardening off before being placed outside, as it seems to suffer from shock easily. Outside, it did well, needed proper warmth to start flowering. Once the heat came it produced like crazy, and continued producing until hard frost. Plant produces round, red pingpong sized tomato, red in colour, 1-1.5" in diameter. Nice full flavour with an acidic bite. Regular leaf. 80 days. Semi-determinate.	Donated to PGRC in 1983.	135
German Cascade	RL, indeterminate plant. 4ft in height. Golf ball size round red brilliant red fruit. Earthy flavour, VERY tasty, with good acidic bite. 85-90 days. Doesn't tolerate heat too well. Moderate production in a really harsh summer. Produces in bunches of 3-5 fruit per.		23
German Murphy			409
German Nebraska	Yields 6-12 oz pink fruit. Productive. 80-85 days, RL, indeterminate.		410
German Striped (Striped German)			316
Gezahnte			321
Giant Belgium (Giant Belgian)	Large 2lb pink fruit, oblate beefsteak shape with reported excellent flavour. Indeterminate. Regular Leaf. 90 days.	Exact origins unknown - claims are that it's an heirloom from Ohio.	102
Giant Tree (Giant Tomato Tree)	1lb+ large pink beefsteak-type. Vines can reach up to 18ft. Indeterminate, 90 days.		24
Gigant-10 Novikova	Large pink beefsteak-type fruit, 10-16 oz with good flavour. Slightly acidic. Tall plants. RL, indeterminate. 80-85 days.	Developed by Russian hobby gardener A.I. Novikov.	411
Gigante de Avila	Strong plant, with with large red fruit. Excellent flavour. Some blossom drop. Red colour. Very late.	Spanish for 'Giant from Avila'	254

Variety Name	Growth Info	Historical Info	Accession #
Gigant Krasnyi (Red Giant)	Large red beefsteak type fruit, up to 450g each. Fruit had marked ribbing, plant is compact and bushy. RL, indeterminate.	Russian commercial variety.	509
Gigant Purelesa	Plants produce large beefsteak, ribbed fruit with pinkish/purplish skin. 9-14 oz, 5" in diameter. Meaty, acidic taste. Early for a larger beefsteak-type. Regular leaf, indeterminate. 75 days.	Russian heirloom tomato from Tamara Yaschenko's collection. Introduced to North America via Tatiana Kouchnareva in 2007 through the SSE catalogue after a trade with Tamara Yaschenko in 2006.	305
Glasnost	3" smooth oblate red fruit, very meaty with excellent flavour. Indeterminate. Regular leaf. 75 days.	Variety from Siberia	25
Gold Ball (Livingston's Gold Ball, Golden Ball)	Plants produce excellent yields of golden yellow fruit, approx 1.5-2oz each. More sweet than tart flavour. RL, indeterminate, midseason.	Developed by A.W. Livingston and introduced commercially in 1892.	276
Golden Bison	Small, bushy plants with round ping-pong ball sized yellow fruit. Minor cracking with heavy rains. Early variety. RL, determinate.	Bred by Professor A. F. Yeager of the North Dakota Experiment Station and released in 1932. Cross between 'Bison' x 'Golden Queen'.	417
Golden Egg	Bright yellow, oval fruit, approx 1" in diameter. 70 days. Regular leaf. Indeterminate		269
Goldene Konigin (Gold King)	Golden yellow fruit, weighing approx 100g. Sweet flavour. Early to mid-season.	Reportedly an old German heirloom dating back to at least 1886.	414
Golden Girl	Plant produces yellow fruit.		213
Goldman's Italian American	Squat, pear-shaped and heavily pleated fruit, which have an almost-bloody intense red colour when ripe. Thick flesh is excellent for sauces and preserves. Excellent yields. Regular leaf. Indeterminate. Mid- to late-season.	De-hybridized from an Italian variety. Amy Goldman brought the seed back after she found it at a vegetable dealer in Italy.	101
Goose Creek	Red globular fruit, about 6-8 oz in size, with reported very good production. A rarer variety. Regular leaf. Indeterminate, 75 days.	Family heirloom from California, USA. Some date it to be from the early 1800's, but history shows there were no smooth tomatoes at that time, so the actual date is unknown.	28
Graf Zeppelin	Hearty plant, good production of very uniform round red fruit approx 2" in diameter. Excellent choice for a market tomato. Good balanced flavour. Regular leaf. 80 days. I saw indeterminate growth, but PGRC lists as determinate.	Donated to PGRC in 1983 from a source in Ontario.	130
Green Grape	Large, strong plant, produced clusters of 8-9 grape tomato type fruit. Green, turning to yellowish green when ripe. Approx. 1oz in weight. 80 days. Regular leaf. Indeterminate.	Bred by Tom Wagner of Tater Mater Farms and released in 1978. Cross of several heirlooms, one of which is 'Evergreen'.	96

Green Pineapple	113-226 g yellow-green fruit. Good flavour. RL, mid to late season, indeterminate.	Heirloom from Springfield, OH, USA.	425
Green Sausage	Elongated 2-3oz green fruit with dark yellow-green stripes. Paste type, sweet flavour. Regular leaf. Determinate. 80 days.	Bred by Tom Wagner of Tater Mater seeds. Originally bred under under 'Green Sleeves' name.	222
Green Velvet	Irregular, ruffled fruit, somewhat beefsteak/oblate shape. Good flavour, mid to late season. RL, indeterminate.		426
Greenwich	Oblate, irregular green fruit, ranges from 113 to 450 g each (mostly in the 250g size range). RL, late season, indeterminate.	Bred by Tom Wagner and released in 1989.	427
Green Zebra	Heavily producing plant, fruit is green streaked with yellow when ripe. Regular leaf. Indeterminate. 80 days.	Non-heirloom, OP. Originally bred in 1983 by Tom Wagner of Redmond, Washington, USA, and was first offered in his Tater-Mater Seed Catalogue.	26
Gregori's Altai	Large pink beefsteak type fruit, sweet with good flavour. Good production, 10-16oz fruit. Indeterminate. Regular leaf. 80 days.	Heirloom from Russia, the Altai Mountains.	27
Grosse des Gers	Nice tomatoey flavour, medium to firm fruit. Really good for fresh eating. Took quite a while from fruit set to ripening, but that might have been due to the heat. Fruit shape is kind of a cross between oxheart and a blocky pepper-like form - very interesting! 3.75 lbs/plant. Regular leaf. Indeterminate. 91 days.		325
Grousha Tcheornaya	113 - 200 g fruit, brown-red in colour with green shouldering. Potato leaf, indeterminate, mid season.	Russian commercial variety. Translates to 'Black Pear'.	428
Guernsey Pink Blush (Guernsey Island Pink Blush)	Oblong cherry sized fruit. Pink. Indeterminate.	Mutation or cross of 'Guernsey Island'.	429
Guido	Large red 8-16 oz fruit, very meaty with great flavour, can be used easily as a slicer or a sauce tomato. Regular leaf plant. 80 days	Introduced in the Seed Savers 2007 Yearbook by Val and Dan McMurray of Wynndel, BC, Canada, who got the seeds from R.R. Bruijn, The Netherlands.	120
Hahm's Gelbe Topftomate	Extremely small 6" dwarf cherry tomato plant. Good production of tasty yellow fruit, Introduced by Reinhard Kraft, Neukirchen, Germany. Rugose foliage. Determinate. 65-70 days.	Introduced by Reinhard Kraft, Neukirchen, Germany.	29
Halicz	Ovate, red fruit. Small plant. Early production. Determinate. Regular leaf. Some radial cracking.	Donated to PGRC in 1993 from Poland.	314

Hana	2-2.5ft plants produce 2-3" oblate/spherical red fruit. Meaty flesh with small seed cavities. Regular leaf. Determinate. Early season.	Developed in Czechoslovakia.	277
Hanigan's Large Yellow	Round, orange fruit, 85 - 170g each. Compact bush growth, RL, determinate, midseason.		430
Hank	Small, ruffled flattened fruit, 14-50g each with sweet flavour. Tall, vigorous plant. Red to pinkish red skin. Regular leaf, indeterminate, mid season.		431
Harbinger	Reportedly very good for ripening off the vine. Classic tomato flavour. Does well in cool/wet areas as it was bred for the British climate. Heat delays production. Regular leaf. Indeterminate. 60 days.	English variety, introduced to the market in 1910.	30
Hazelfield Farm	Red flattened fruit with ribbing on the shoulders. Juicy with full tomato flavour. RL, indeterminate.	Stabalized cross from Hazelfield Farm, Kentucky, USA.	432
Henderson's Pink Ponderosa (Henderson's Ponderosa)	8-12oz pink meaty fruit, sweet mild flavour. Fruit is slightly irregular and flat. Regular leaf. Indeterminate. 85-90 days.	Introduced by Peter Henderson & Co. in 1891.	229
Herb Taylor Golden	Oblate, pleated fruit. Orange skin. Good leaf coverage. Mid-season. Indeterminate. Regular leaf.	Donated to PGRC in 1991 from Virginia, USA.	313
Hezhou	50-113 g pink fruit, irregularly shaped with acidic flavour. RL, indeterminate, midseason.	Seeds sent to Gary Ibsen, the owner of TomatoFest , from a family farm in Zhengjiang province of China.	433
Hog Heart (Hog's Heart)	Irregular shaped red fruit - can be more oblong/banana shape, or closer to an oxheart shape. Few seeds, good for preservation and sauces. 90 days, RL, indeterminate.	Italian origin, introduced to North America sometime between 1910-1920.	434
Homestead	Uniform market-type, all purpose tomato. Red beefsteak-type fruit, 4-8oz each. Good production, good flavour. BER and split resistant. Determinate. Regular leaf. 65-75 days.	Bred by Florida Agric. Expt. Sta. and the Southeastern Breeding Laboratory, USDA, Charleston, South Carolina. ((Victor x Dobbies Champion) x Pan America x Rutgers) - released around 1950.	235
Huang Se Chieh	Round yellow fruit. Early to mid season production.	Obtained at the Botanical Garden, Peiping, Feb. 24, 1931. Donated to USDA in 1931	161
Huevos De Toro (Couilles de Taureau)	Large, flattened red beefsteak fruit, approx 1 lb each. Late, RL, indeterminate.	Spanish variety. Seed was translated to Couille de Taureau and redistributed by Tatiana's Tomatobase under that name before identifying the original Spanish name.	423
Huevos De Toro (Couilles de Taureau)	Bright red flattened beefsteak fruit, up to 1 lb. Ruffled and irregular. 80-85 days, RL, indeterminate.	Spanish heirloom.	380

Humph	Ind. RL plant. 5-10 oz green fruit with amber blush. Smooth texture.	Nancy Kirch of Binghamton, NY, discovered this tomato at a local nursery. Original seed came from one of the nursery employees who grew it as a family heirloom.	194
Hurma (Khurma Ukrainian)	Plant produces large, golden fruit, oblate shaped. Excellent for fresh use, sweet flavour. 3-7oz . 85 days.	Originally from the Ukraine.	244
Ingegnoli Gigante Liscio (Gigante Liscio)	Irregular beefsteak-type fruit. Meaty with juicy flesh and a full flavour. Good production in higher temperatures. 10-24 oz. RL, indeterminate, 75-90 days.	A historic Italian heirloom developed around 1920 from a cross of Ponderosa and St. Louis.	412
Isis Brandy	Bicoloured red/orange fruit, ranging from globular to more flattened. Sweet flavour, RL, indeterminate.	Cross between Isis Candy x Yellow Brandywine	436
Isis Candy	1 oz cherry tomato, yellow/orange with a pink blush when ripe. Firm flesh, large seed cavities, moderate yields. Indeterminate. Regular leaf. 75-80 days.	Bred by Joe Bratka of NJ, one parent is Marizol Purple. Joe Bratka introduced it through SSE in 1992.	31
Ispolin Malinovy	Oblate dark pink fruit. Indeterminate. Very productive. Firm fruit, nice flavour. Non-uniform fruit with some radial cracking. Indeterminate. Regular leaf. 82 days.	From Siberia.	201
Italian Noire	Oval grape-type fruit with brown skin and green shoulders. Good flavour. 70 days.		274
Italian Purple	226 - 454g pinkish purple fruit. Potato leaf, indeterminate, late (85+ days).	Seed originated from a SSE member VA LE J in 1983, who obtained the seed from a neighbor who got it from a friend in Kentucky.	437
Italian Winter	Stocky plant produces round, yellow 2" fruit. Some blossom drop. Doesn't like really cold weather. Regular leaf. 75 days. Indeterminate.	Donated to PGRC in 1970 from Italy.	136
Izumrudnoe Yabloko (Emerald Apple)	Compact plants, beefsteak-type fruit that mature to a light green with yellow shouldering. 8-12 oz, buttery texture. Early maturity for larger fruit. RL, indeterminate, midseason.	Russian origin.	400
Jack Johnson	Oblong, black fruit. 113-226 g each, sweetish flavour. Hot weather may affect fruit set/ripening. RL, mid season.		438
Jack White	Large, white 8-12oz yellow/white fruit. Cross between White Tomesol x Great White x White Beauty. Regular Leaf, 80 days.	Bred by Alan Bishop of Hipgnosiss Seed. A stabilized cross White Beauty x White Tomesol. Named after Jack White, lead singer of the White Stripes band	92
Japanese Black Trifele (Yaponskiy Trufel Chernyi)	Produces 4-7oz pear shaped fruit with dark brown/black skin. Very good flavour, good producer. Some green shouldering. Potato leaf. Indeterminate. 70-80 days.	Russian OP variety.	32
Japanese Striped			440

Jasnaja	Red, oblong plum type fruit.		441
Jaune de Nole			442
Jaune Flammee	Deep orange skin, fruit 2-3oz each, borne in clusters on the vine. Sharp taste, excellent flavour. Regular Leaf. Indeterminate 75 days.	French family heirloom, originating from Norbert Parreira of Helliner, France. Name means 'Firey Yellow'.	33
Jitomate Bulito	Produces elongated, 3" long red fruit. Used for fresh uses and preservation. Point on the blossom end. Semi-determinate. RL. 85 days.	Reportedly Mexican heirloom used by that Zapotec people.	240
Joffre	Black/purple fruit with green shoulders and reportedly very good flavour. Regular leaf. Indeterminate. 75 days.	French OP, possibly heirloom variety said to be named after a WWI French field marshall.	34
Jordanische Tropfenförmige			443
Jubliee (Orange Jubliee)			151
Kardinal/Kardinal Large Blunt	High yields of large heart shaped meaty fruit. Semi-determinate, RL. Midseason.	Potentially the same variety as 'Mazarini'?Russian commercial variety.	444
Karlik	Indeterminate, reg leaf variety. Marbled(?) skin. Early production, good yield. Oblate fruit.	Originally collected from the former Soviet Union in Moscow, introduced to the USA via a donation to the USDA. Then donated to PGRC in 1965.	307
Kazakh Schalavije	Good production of 6-12oz orange fruit with excellent flavour. Regular leaf. Indetermiant. Rare. Late season.	The name implies it may have originated in Kazakhstan (a republic in the former USSR, now an independent country). Variety brought to SSE from CV Anioleka Seeds of Scotland.	97
KBX (Kellogg's Breakfast Cross)	Large, orange 454-1 kg fruit. Flattened beefsteak type. Late season, PL, indeterminate.	Potato leaf version of Kellogg's Breakfast that appeared in a garden of Martha Hufford of SE VA (gardenmama), a Tomatoville/Garden Web member.	445
Keeping Tom	Heralded for its keeping properties, will keep for many months if picked green and kept in a cold cellar. Small Indeterminate plant, productive tomato, that ripens slowly and stays in good shape long after harvesting. May Be picked part ripe and will ripen slowly in cool place. Oddly, it may often appear unripe, but when cut it will be bright red. Indeterminate. Regular leaf.		35
Kelli's Heart	Pink, meaty heart shaped fruits. Sweet flavour. 170-340g each. Indeterminate, RL wispy leaves. Midseason.		446
Kimberley	Early, tall and sprawling plant, high yields of 1-2" round red fruit, slightly oblong. Indeterminate. Potato leaf. 55-60 days.	Named after Kimberley, BC where it was bred in the 1980's (parentage is disputed).	36

King George			447
King Humbert (King Umberto, Roi Humbert, Re Humbert)	80 days.	Old Italian paste tomato. Described as far back as 1885.	184
Kmicic	Firm red, plum or spherical shaped fruits. Slight orange shouldering. Good for canning. 50-115 g each. Determinate, RL, early.	Polish commercial variety, vended by PNOS Ozarow Mazowiecki.	448
Kolea	Red, 4" diameter fruit. Regular leaf.	Donated from the University of Hawaii to the USDA in 1962.	163
Kootenai	Very early compact plant, produces slightly oblate 2-2.5" red fruit. Moderate to good production, sweet juicy fruit. Determinate, 60 days, rugose leaf.	Brought to the Kootenay region of BC with Russian Doukhobor settlers.	91
Korall (Corall)	Round, red fruit. Determinate, RL. Mid season.		449
Korean Love	Sweet, medium sized red fruit. Oblate. RL, indeterminate, midseason.		450
Korney's X (Korney's XXX, Korney's Cross)			451
Kotlas	Plant produces good harvests of red fruit, some more spherical, but others with a point at the blossom end. Good flavour, 1-2oz fruit. Compact plant, can be grown in 5gal containers. Potato leaf. Indeterminate. Early season.	Originally named Sprint, but changed to Kotlas by Johnny's Selected Seeds upon Kotlas becoming a sister city with Waterville, ME, USA.	295
Krakus	50-125g round red fruit. Smaller, determinate plants. RL, midseason.	Polish commercial variety. Terry Hancock, Wiltshire, England, purchased the seed at a market place in a small Polish town and shared with other growers.	452
Krasnodar Titans	Round, red sweet fruit, approx 226-1kg in size. Dense foliage. RL, determinate, midseason.	Originated from Russia, Krasnodar region.	453
Krymska Roza (Krymskaja Roza, Red Crystal)	Red oblate fruit.	I believe this is actually 'Krymskaja' and not 'Krymska' as labelled. Potlish variety?	454
Lambert's General Grant	This very old heirloom has large rose-pink fruit that are oblate and ridged. Vine ripened fruit have the best flavor. Indeterminate, finely dissected foliage. 85 days.	Developed by a gardener named Mr. Lambert in Bellefonte, Pennsylvania in 1869.	37
La Mer Noire		Potentially 'Black Sea Man' just going off the name (which is "black sea" in French).	455
Large Mennonite Heritage (Large Mennonite Pink)	Large dark pink fruit, 250-454 g. Sweet flavour. Potato leaf, late (85 days), indeterminate.		456
Large Pink Bulgarian	Large pink beefsteaks, 250-450g each. Good taste. Mid to late season. RL, indeterminate.	Family heirloom from Bulgaria.	457

Lyana	Plant produces good harvests of 1-2oz round, red fruit. Meaty with small seed cavities. Strong tomato flavour. Plant grows about 2-2.25ft tall, good for growing in containers. RL, determinate, 55-70 days.	Moldovan var., bred by Pridnestrovian Agric. Res. Inst., (Leto x Cheburashka) x Start cross. Released in 1996.	300
Maglia Rosa	2" long rosy fruit streaked with orange. Elongated fruit. 18-24" plant, good for containers and small spaces. Determinate or semi-determinate. 75 days, RL.		418
Malinovy Ozarowski			322
Malinowy Olbrzym	Large pink beefsteak fruit with slight ribbing. Juicy. RL, indeterminate, midseason.	Means "Raspberry Giant" in Polish	463
Malinowy Retro	Round pink fruit, approx 260g each. Good flavour, good for fresh and canning. Compact plants. RL, determinate, midseason.	Polish commercial variety.	464
Mama Leone	Produces high yields of 3-6oz plum-type fruit. Very good flavour, excellent for preservation. Regular leaf. Indeterminate. 80 days.	Introduced to SSE by Nancy Kirch, New York, in 2005. Nancy obtained it from a local nursery in NY, originally from a customer who immigrated here from Italy with the seeds many years ago.	100
Manitoba	Early determinate variety bred for the short seasoned prairies. Very good variety for cool climates and short seasons, if in high-heat temps it will delay production, but doesn't seem to hamper it. good flavour and excellent yields. 2-6oz (reports of 10-14oz) each, red globular fruit, tart flavour. Determinate. regular leaf. 65 days.	Breeder and vendor: Expt. Farm, Morden, Manitoba, Canada. Parentage: (Marglobe x Bounty) x Redskin. Adaptation: Southern Canadian prairies. 1956.	39
Mannheim	Pink oblate fruit with smooth shoulders. Potato leaf, indet, 80 days.	Reportedly brought back to N. America during WWII by a veteran who obtained the seeds from the Mannheim region.	465
Marammeno	Average taste, productive. Midseason.		466
Marge's Polish Pride	Large pink beefsteak, 400-500 g each. Meaty with small seed chambers with good flavour. Large vigorous plants. Potato leaf, indeterminate, 85 days.	Polish variety. Seed came from a lady called Marge, who passed them onto her son-in-law.	467
Marizol Red	plants produce large, 14-16 ounce, slightly-flattened, bright-red, beefsteak tomatoes with outstanding flavor with juicy sweetness and complementing acidity. RL, indeterminate, 85 days.	From the Black Forest region of Germany by Joe Bratka of New Jersey. A family heirloom from the 1800s brought to the U.S. by Joe's grandfather. Seeds introduced to SSE in 1992.	577
Marutchka			468
Mary Unger	Round red fruit, productive. Good for canning and fresh use. RL, indeterminate.		416

Matt's Wild Cherry	Rampant vines produce prolific amounts of small, currant type tomatoes. Excellent tart full flavour, fruit approximately 2gr each. Regular leaf. Indeterminate. 70 days.	Originated from Mexico where it grows wild. Teresa Arellanos de Mena, a friend of Maine Ag. Faculty's Dr. Laura Merrick and Dr. Matt Liebman, brought seed to Maine from her family in Hidalgo in Eastern Mexico.	171
McMurray's Purple		Found in Dan & Val McMurray's seed collection. Original tag said 'Honey', but is not the 'Honey' variety otherwise known. Dan marked this one down as a purple round fruit. Temporarily re-named to 'McMurray's Purple' in 2020.	435
Mexican Cocktail	Ind. RL plant. Tiny red currant tomatoes. Disease tolerance exhibited. Large, sprawling growth habit. Early maturity.		197
Michael Pollan	Green & yellow/gold striped fruit, slightly elongated and plum shaped approximately 3" long. 5ft vines. Sweet, mild flavour.	Grown and selected by Wild Boar Farms in California, USA.	238
Milka's Red Bulgarian	Good yield of red beefsteak fruit, approx 300 g each. Indeterminate, regular leaf, 80 days.	Bulgarian variety introduced by Dr. David Kroska, who named it Milka's Red Bulgarian after the person who gave him the seeds.	469
Miller's Dakota			470
Millionaire	Good yields of 250g pink fruit. RL, indeterminate, 75-80 days.	A famous tomato in the 1950s in the Ozarks of Missouri. In the summer of 1950, Forrester Hutsell of Mountain Grove, Missouri, gave this tomato to Ed Henson, and it has been grown in Champion, Missouri ever since.	471
Milyana	150-200g red fruit, oblate with slight ribbing. Determinate, early.	Bulgarian commercial variety?	472
Moldovan Green	6-8oz green fruit with a yellow blush. Smooth texture. Sweet/tart flavour. Regular leaf. Indeterminate. 75-80 days.	Heirloom from Moldova. Introduced to North America by Glenn Drowns of Iowa, USA.	258
Moonglow (Moon Glow)	Golden orange round fruit, approx 150g each. RL, indeterminate, 80 days.		473
Morado	Good yield of 300g dark red/purple fruit. Rich flavour. RL, indeterminate, late (85 days).	This variety is native to Vejer de la Frontera, a Spanish hilltop town and municipality in the province of Cádiz, Andalusia, on the right bank of the river Barbate.	474
Morado del Rincon de Ademuz	Pink/purple beefsteak tomato.	Spanish for 'Purple from Ademuz'.	248
Moranno de Mejorada	Big, round red fruit. Strong, dense plant.	Spanish for 'Moorish from Mejorada'	253
Moscow Siberia			476

Moskovskiy Delikates (Moscow Delicious)	Good yields of red elongated (3-4") long fruit. Sweet with dry flesh paste tomato. RL, indeterminate, 80+ days.	Russian commercial variety.	475
Moskvich (Moskovich, Moskvic, Moskovic)	70-75 days, indeterminate, regular leafed plant. Good sized 10-14oz fruit. Excellent flavour, very meaty. Good for canning as well. Does well in high heat with water restrictions, only a bit of cracking. Your classic looking tomato. Needs heavy staking to accommodate the large fruit. 5.5lb/plant.	From Russian it is translated to "person who lives in Moscow". Developed in the 1970's by Vavilov Institute (IOGEN, Moscow).	41
Mountain Princess	Plant produces 6-8oz red smooth beefsteak-type fruit. Determinate. RL. 65 days.	An heirloom grown for generations in the mountain climate of the Monongahela National Forest Region of West Virginia.	289
Mozark	Red round fruit. Determinate, late. RL.	Mozark is a stabilized cross of Earliana, L. pimpinellifolium, Break O'Day, Bison, and Greater Baltimore. It is well adapted to sweltering Midwestern and Mid-South summer conditions. It was released n 1958, and now discontinued.	477
Mr. Fumarole (Mr. Fumo)	Plant produces elongated, 3-6" red fruit, with pinkish/red skin. Paste variety. Low production. Heat delays fruiting. 65 days.		299
Muchamiel	Red oblate fruit with ribbing on the shoulders. Mild, sweet taste. Very productive. RL, indeterminate, midseason.	Spanish origin?	478
Nectar Rose	Pink, small fruit. RL, indeterminate, midseason.		479
Negrillo de Almoguera	Black beefsteak fruit. Excellent flavour.	From the area of Almoguera, Guadalajara, Spain.	256
Negro de Jaen	Black beefsteak fruit. Good taste. Late harvest.	Spanish for 'Black from Jaen'. From the area of Jaen, Spain.	249
Negro de Siles	Brown black oblate fruit with ribbing on the shoulders. Approx 180g each. RL, indeterminate, midseason.	Originated in Spain, likely from the village Siles, in the province of Jaizón, Spain. Sometimes misspelled as 'Negro de Silex'	480
Neighborly			481
Nelson's Golden Giant	Large golden yellow beefsteaks, approximately 350-450g. Meaty with few seed chambers, rich sweet taste. RL, indeterminate, 85 days.	Originally from Nelson Gray, Milan, Ohio, who shared seeds with Al Anderson of Troy, Ohio (OH AN A). Al introduced this variety to SSE in 2007.	482

Neves Azurean Red	Oblate, large beefsteak type fruit. Approx. 13-16 oz in size. Regular leaf. Indeterminate. 80 days.	Seeds were collected by Carolyn Male (NY MA C) in 1999 from a retired P.E. teacher Chuck Perry, who got the seeds from his cousin, Ed McCollum of Boston, who, in turn, got the seed from the owner/founder of the Neptune Harvest Co. Dr. Carolyn Male contacted the Neptune Harvest founder, and he said that a man came to the factory and asked if he could trade tomato fruits for seaweed fertilizer. This man was Anthony Neves of Massachusetts (now deceased), who brought the seed from the Azores, where he had been selecting for larger size, and he continued the selection in Massachusetts.	199
Nicholaevna Pink	Plant produces an abundance of beautiful , large, 1-2 lb, pink, beefsteak tomatoes with lots of rich, flavorful tomato juice. A good hardy variety that produces fruit even in cooler growing regions. Disease resistant.	Russian heirloom from Smolensk in Western Russia. Nicholaevna is a woman's middle name. In Russia people may use a middle name when addressing an old woman or an old man	575
Nikolai Dukhov	Solid, red beefsteak type fruit. Nice flavour, really good production. Regular leaf.		581
Nonna Antonina	Red beefsteak fruit, very productive. Regular leaf. Indeterminate.	Italian for 'Grandma Antonina'. Italian family heirloom from Sara Porporato and Jiri-M. Schrieter, Volvera, Italy from Sara's grandmother, who grew the tomato for more than 40 years.	252
Norcarolina Pink (North Carolina Pink)			484
Norderas Busk	Early bush tomato, smooth round red fruit, approx 80-100 g each. Plant grows 80-90 cm high. Determinate.	Norwegian origin?	483
Novice			487
Novocserkaskij	Blemish free red oblate fruit with some darkening and ribbing at the shoulders. Great classic tomato flavour, not too sweet. Strong, stout bushy plant. High temps during the later half of summer seemed to have delayed ripening, but still produced really well. Semi-determinate. Regular leaf. 82 days.	Donated to PGRC in 1984.	309
Oaxacan Jewel	Large fruit, 6-16oz, golden yellow with red and orange marbling. 80 days. Regular leaf. Ind.	Pre-Columbian Mexican variety.	181
Ocharovanie	Round golden orange fruit, approx 115g each. Early fruit sed, good flavour. RL, indeterminate, approx 75 days.	Moldovan commercial variety. Name means "charm" or "fascination" in Russian.	488
Ojo de Venado	Oval red cherry, balanced rich taste. Productive 4' tall plants. 80 days.	Reportedly grown by the Zapotec people of Mexico, from Sierra Madre del Sur. Name translates as 'Eye of the Deer'.	198

Variety Name	Growth Info	Historical Info	Accession #
Olive Doree	Grape-type tomato with orange skin, RL, indeterminate, midseason.	Heirloom from France	496
Olive Hill	Deep pink heirloom. Can weight 450g +. Potato leaf, indeterminate.	Heirloom from Olive Hill Kentucky, USA.	489
Ondraszek	Early maturing. Round red fruit, approx 150g each. Uniform fruit. Determinate, RL.	Polish commercial variety	490
Orange Heirloom	Large, orange oblate beefsteak type fruit, approx 350-450g each. RL, indeterminate, 80 days.	Family heirloom, grown in the Weaverville area of the North Carolina mountains by the Sherman family for well over 75+ years.	491
Orange King	Orange, meaty fruit.	Donated from an unknown source in 1961 from New Hampshire, USA to the USDA.	155
Orange Oxheart	Large 12-16oz fruit, oxheart shape, firm flesh and few seeds. Regular leaf. Indeterminate. 80 days.		42
Orange Russian 117	Orange and pink heart shaped tomatoes. Crack resistant. Good harvest. Regular leaf. Indeterminate. 90 days.	Jeff Dawson's selection from his cross of Russian 117 and Georgia Streak.	236
Orange Tree	Compact dwarf plant, grows approximately 24-30" high. Good production of 85g orange fruit. Rugose leaves appear curled even when the plant isn't under stress. Determinate, 80-90 days?		492
Orangina	Large orange oblate fruit, approximately 300g each. Small seed chambers, sweet flavour. RL, indeterminate, midseason.	Discovered, stabilized and named by Darrel Jones of Hamilton, Alabama. In his 2004 garden he found this offtype among his Argentina plants that he grew from seed sent by 'Brainsander'. One of the three was a large orange fruited tomato with good flavor and excellent production. The plants were just a bit variable the first couple of years indicating a cross, but by F5 generation (2008) it was stable.	493
Oranje Van Goeijebier			494
Orlov Yellow	Ind. PL plants. 10-16 oz orange beefsteak-type fruit. Smooth shoulders, no core. Firm flesh. Very good flavour and very productive.	Seeds from Smolensk in Russia, said to have originated with Count Aleksei Orlov from the 18th century.	188
Oscar Gonthier's	Large red beefsteaks, more acidic than sweet flavour. Fruit approx 370g. RL, indeterminate, 80-85 days.	Heirloom from Canada. Original seed was from Oscar Gonthier of Drummondville, Quebec, Canada.	495
OSU Blue	80 days. RL plant. Deep blue fruit the more sunlight they are under. Pinkish flesh.	Bred by Jim Myers of Oregon State University.	185
Pantano Romanesco (Pantano, Il Pantano Romanesco)	Red ribbed fruit, approx 280g each. RL, indeterminate, 80 days.	Said to be an heirloom from the Rome region of Italy.	497

Paragon (Livingston Paragon, Livingston's Paragon)	Red spherical fruit, excellent yields of 3-4" fruit. Great for canning. Regular leaf. Indeterminate. 75 days.	Alexander Livingston's first breed of tomato, which was introduced in 1870. This variety was a mainstay of the New Jersey canning industry and reportedly was named for the Paragon canning jar of that era.	275
Parma	Red, oblate, pleated(?) fruit. Early maturity, indeterminate. Large plant. Regular leaf.	Donated to PGRC in 1984.	310
Patio Orange (Orange Patio)	Called Patio Orange but rumour has it fruit is more red than orange? Requires grow out.		498
Paul Bunyan			499
Paul Robeson	Pleated/irregular brown-black-purple fruit. 7-15 oz each. Reportedly up to 2lbs. Very good flavour, fair yield. Regular leaf. Indeterminate. 70-75 days.	Russian heirloom which was made available by Marina Danilenko, a Moscow seedswoman; named in honor of the black opera singer star of King Solomon's Mines, 1937, Paul Robeson, who was also an advocate of equal rights for Blacks and was very popular in the former Soviet Union.	43
Peasant	Plum type red fruit. RL. Heat reportedly delays ripening and affects flavour.		500
Perennial	Small bright yellow fruit. Regular leaf.	Originally from the Dr. H.L. Blood Collection No. 823. F.R. Lawson, Modesto Calif. 1936. Donated to USDA in 1966.	158
Perestroika	Red-orange uniform smooth fruit, solid 8-10oz meaty with few seeds. A market favourite. Indeterminate. Regular leaf. 70 days.	Russian variety from Siberia. Perestroika is the Russian term (now used in English) for the economic reforms introduced in June 1985 by the Soviet leader Mikhail Gorbachev. Its literal meaning is "restructuring", referring to the restructuring of the Soviet economy.	44
Pero Gigante (Pomodoro Gigante, Pomodoro Pero Gigante)	Large, red pear shaped fruit. Some fruit is more flattened with ribbing? RL, indeterminate.		504
Persimmon	Deep yellow/orange fruit. Vigorous vine. 1lb+ beefsteak fruit. Dates back to the mid-1800's. Meaty and sweet. Regular leaf. Indeterminate. 80 days.	Reportedly dates back to the mid 1800's - although no information can found.	45
Perth Pride	Smaller plant (3-4ft) produces smooth round 2-5oz fruit that ripen to a deeper purple colour. Very good flavour. Fruit does not keep well after picking. RL (rugose) leaf, indeterminate. 70-75 days.	Developed in the 2006-2011 by the members of the Dwarf Tomato Project from a cross between New Big Dwarf and Paul Robeson, made in 2006 by Patrina Nuske Small in Australia and named Happy. This tomato was selected and named by Tessa Millesse who lives in Perth, Western Australia.	287

Picardy	Oblate 200g smooth red fruit. Good flavour, meaty with few seed cavities. Semi-determinate, RL, 75 days.	Heirloom reportedly dating to the 1890s.	501
Pink Accordion	Plant produces average yields of heavily pleated and ribbed red fruit. Large sprawling plants that require good staking, fruit is approximately 1lb each. Hollow with a mild sweet flavour. Indeterminate. Regular leaf. 80 days.		107
Pink Climber	Pink, globe shaped fruit, approx 400g each. Potato leaf. Indeterminate.		502
Pink Zebra	Dark red/brown striped with green. Extremely tasty, although did not do well for me in grow out in 2011. Grew very well in 2014. Likes drier climates, very tasty and meaty fruit. 85 days. Regular leaf.	Possibly a misnamed variety?	46
Pixie	There are several varieties with the name 'Pixie' in them, a grow out will have to be done to determine which 'Pixie' this is.		98
Platillo	Large oblate, heavily ribbed fruit. Good flavour, orangey-red skin with slight mottling, and orangey flesh. Fruit is approx 220gr each (8 oz). Best for fresh eating. Moderate leaf coverage. Regular leaf, indeterminate, 80-85 days.	Collected in 1966 from Puerto Rico and donated to PGRC.	175
Plum Tigris (Slivovidnyi Polosatyi)	Regular leaf plant with a high yield of 4 oz plum fruit with red and yellow skin, very good flavor. 80 days.	introduced to North America by Andrey Baranovski, Minsk, Belarus.	47
Pocomoke	Deep red fruit, uniform and smooth in shape. Crack resistant, slight catfacing. High degree of tolerance to fusarium wilt. Determinate.	Donated to the USDA in 1962 by the University of Maryland.	157
Polish Egg	Red egg shaped fruit. RL.		503
Polish Linguisa	Elongated red, paste type tomato. Wispy plant. 5-6" long dry red fruit. Sweet flavour. Good productivity. Semi-determinate. Regular leaf. Late harvest.	Heirloom variety from Poland, brought to New York by a family of Polish immigrants in the late 19th century.	88
Pollock	Plant produces uniform globe-shaped 4-6oz fruit with very good flavour. Compact plant, still requires staking. Regular leaf. Indeterminate. 70 days.	A selection from Bonny Best for earliness, productivity and good cores by Andy Pollock of northern British Columbia, Canada.	247
Poma Amoris Minora Lutea	Stout plant produces moderate harvests of 5-8oz pale yellow fruit. Good flavour. Does not like being kept wet. 75 days.		173

Variety Name	Growth Info	Historical Info	Accession #
Portuguese Joe's (Joe's Portuguese)	Large tomatoes, very irregular and heavily pleated fruit. Very good flavour. 8-18oz fruit. Indeterminate. 80-85 days. Regular leaf.	Portuguese variety, named by Val and Dan McMurray (B.C MC D). Dan picked the seeds out of a salad in Portugal in the late 1990s or early 2000s, and they have been growing this variety in their garden since then.	246
Portuguese Monster	Large 1 kg+ fruit, pink skin, Fruit is described as being a blunt oxheart shape. RL, indeterminate large plants, 85 days.	Seed collected by Michael Johnson of Wollaton, Nottingham UK, from a 4.5 lb tomato bought at Loule Market, northern Portugal in 2006. Michael shared the seed with his gardening friends at Tomatoville in 2007 as 'Portuguese Monster'.	505
Prairie Fire	Early determinate red variety, globular and slightly oblate in shape. Good flavour. 70 days. Regular leaf. Determinate	Possible cross between Sub-Arctic and an unknown beefsteak. First listed in SSE in 1992.	214
Prairie Pride	70 days.	Released from the University of Manitoba in 1978.	215
Primrose Gage	Described has having a sweet/tart flavour. Small round yellow fruit.	Collected in 1931 by Dobbie and Co. (Edinburgh, Scotland, UK) in the village of a seminomadic tribe in the jungle of southern India between 5,000 and 8,000 feet altitude.	160
Principe X (PSB-6)	Semi-determinate bushy plants produce plum-type fruit, excellent for preservation and pastes. Fruit is red with a tip at the bottom, plant is prolific in yields. Regular leaf. Midseason.	Italian heirloom bred for sun-drying. Dates back to the 1910s.	99
Prize of the Trials	Round, cherry type fruit with orange skin. RL, indeterminate.		506
Pruden's Purple (Prudence Purple)	Indeterminate potato-leafed plant. 75-85 days. Plant produces dark pink beefsteak fruit, sweet flavour with smooth texture. Fruit measures 10 - 16oz, moderate to good yields.	Variety dates back to at least the 19th century.	76
Prue	Elongated, large red plum type fruit, somewhat variable in shape. As small as 100g up to about 350g. Wispy, light leaf cover. Good flavour. RL, indeterminate, 85 days.	Originated from Tom Gallucci of Connecticut, seeds came from Tom's ex-wife's grandfather, Mr. Prue of Massachusetts, who was born around 1900 and had been growing this tomato in the 1940s or earlier. Original source is unknown.	507
PSB-1 (Mary's Austrian X)	Plant did not come true to package. Conversation with seed seller indicated that this variety was not a mislabel, it is a cross that occurred naturally between Mary's Austrian and an unknown cherry variety. Delicious grape-sized pink jeweled fruit on a large (5ft+) plant. Fruit borne on trusses of 5-6 fruit. Sweet, rich flavour with firm flesh. RL. 75-80 days.	Heirloom originally from Austria, came to Salt Spring Island, BC in the early 1900's, and grown their by the same family by over 100 years.	241

Variety Name	Growth Info	Historical Info	Accession #
PSB-3 (Lancia X)	<p>Indeterminate. Oxhart type, good fresh or for paste.</p> <p>Unable to contact donater of seed, but growth was not like that of Lancia, indicating a natural cross between 'Lancia' and an unknown parent.</p> <p>Beautiful, jewel toned pink fruit with some light yellow shouldering, rich, full flavour (especially for a pink!). Buttery-textured soft flesh. Regular leaf. Later maturity - 85-90 days.</p>		94
PSB-5	<p>Natural cross from seed sent to seed bank. Tall, vigorous plants, lots of round cherry fruited. Red skin and flesh, great grower in a bad year (2019). RL, indet. 103 days in 2019, but a better year would probably see that shortened dramatically.</p>		415
PSB-5 (Aunt Ruby's German Green X)	<p>Seed received was a natural cross - larger late season variety with great taste, but fruit was a dusty pink as opposed to green. Saved seed to re-grow in a future year.</p>		93
Purple Calabash	<p>Deeply fruited/pleated pinkish/purplish/brown fruit with green flesh and gel. Touted as the world's "ugliest tomato". Indeterminate. 85-90 days. Regular leaf.</p>	<p>Exact history is unknown, but evidence suggests it was originally from Mexico. Very old variety. Donated to the USDA in 1963.</p>	142
Purple Plum Paste	<p>Large, ind. Paste. Good flavour. RL. 80 days.</p>		179
Purple Prince (Black Prince)	<p>RL plant, produces tennis ball sized brown/dark purple fruit. Slightly ovular in shape. 3-4oz each. Quite tasty, but didn't seem to withstand really high heat and water rationing very well. Poor production in my area. 80-85 days.</p>	<p>Reportedly an heirloom from Siberia.</p>	48
Purple Russian	<p>Plum-type shape, although quite juicy so not appropriate for pastes. Brownish-pink fruit, some green shouldering. Very good flavour. Heavy production. Regular leaf. Indeterminate 75 days.</p>	<p>Heirloom variety from the Ukraine. Seed are originally from Irma Henkel, 1980 and then introduced to North American market.</p>	49
Quarter Pounder With Leaves			508
Radinilee	<p>Plants produce 2-6oz black/purple fruit, shape ranging from oblate to more spherical. Somewhat irregular shape. Some green shouldering. Very good flavour. RL, indeterminate, 80 days.</p>	<p>Reportedly from Russia, but the name is not of Russian origin. Unclear whether it was just renamed, or if it is not actually from Russia.</p>	280
Red Jacket	<p>Potato leaf. Indeterminate red fruit.</p>		510
Red Peach			511

Variety Name	Growth Info	Historical Info	Accession #
Red Robin	Small dwarf plant, growing to approximately 25-30cm high. Well suited to containers. Produces tight clusters of 6-8 red cherry tomatoes. Good production. Said to be able to produce under even poor light conditions. Determinate, regular leaf, 55-60 days.		77
Reisetomate	Plant produces heavily lobed fruit that resemble cherry tomatoes all fused together. Fair flavour. Regular leaf. Indeterminate. 80 days.	German heirloom?	271
Rena's Turban			512
Reverand Morrow's Long Keeper	Plants produce 6-10oz reddish orange fruit. Determinate. Midseason. Regular leaf.	Louisiana Heirloom?	257
Rhumba Ozarowska	Small, round to slightly flattened red fruit. 50-80g each. Compact plants, do well in containers. Determinate, RL.	Polish commercial variety.	513
Rita's Black	Really more of a dark red/brown/mahogany than a black fruit. Sweet flavour, very meaty with tart skin. Some susceptibility to cracking in downpours. Potato leaf, indeterminate.	Val and Dan McMurray (B.C MC D), who actively exchanged seeds with European growers, asked Rita De Clereq in Belgium to try and get hold of some of the local Belgium "heirlooms" or family varieties when they started trading with her. She found four varieties, two of which appeared to be the same, and which were later named Belgian Farmer's Beefsteak, Belgian Pounder and Belgian Heart, as the original names have long since been forgotten. Rita's Black was a spot of Belgian Pounder, and it was named after Rita De Clereq.	327
Riviera	Semi-determinate, red round fruit. RL.		514
Robson Angolan			319
Rochapea			515
Roma VF	RL, det. Plant. Good production of plum shaped fruit. Best for sauces, canning, and preserving. Very dry. VF resistance. 70 days.		50
Romeo	Good for sauces and fresh eating. 170-340g fruit. Good flavour. RL, indeterminate.		516
Rosado de Aracena	Beefsteak pink tomato, strong sprawling plant. Slightly oblate shape. Late harvest.	Spanish for 'Pink from Aracena'. Traditional in the villages in the mountainous area of Aracena y Ricos de Arodre in the south of Spain.	250
Rosado de Teruel	Pink beefsteak fruit.	Spanish for 'Pink from Teruel'. From the town of Teruel, Spain.	255

Rose	Large pink, irregular beefsteak-type fruit. Very good flavour, 3" 10oz fruit. Reportedly a cross between Brandywine and Rutgers tomatoes, crack and disease resistant. Indeterminate. Regular leaf. 80 days.	Amish heirloom from New Holland, PA, USA.	51
Rose Climber			517
Rose d'Eauze	Very late variety - might possibly be weather related, but really best grown in a longer season climate. Pink heart-shaped fruit with mild flavour. Regular leaf. Indeterminate 90+ days.		331
Rot-Orange Eiertomate Aus Rumanien			518
Rozovye Gryozy	Plants produce large pink oval-shaped fruit, approx 11oz each. Excellent flavour. Wispy foliage. Regular leaf. Indeterminate. Early season.	Introduced in North America by BC KO T, who received the seeds from Tatiana Afanasieva, an avid gardener and seed saver from Chelyabinsk, Russia. Not commercially available in Russia. Name translates to "Pink Dreams" from Russian.	284
Rozovyi Izumnyi	Ind. RL, high yield. Large pink beefsteak-type fruit up to 1lb. Juicy, sweet flavour. 80 days.	History unknown. Seeds acquired from Russia. Translates to Pink Raisin-like from Russian.	196
Ruby Treasure	Winter keeping variety, will keep for a few months in a cold cellar and ripen slowly if picked green for storage. Red fruit, firm with smooth skin, retains excellent flavour and colour for storage. Excellent producer - heat doesn't slow it down. Indeterminate. Regular leaf. 85 days.	Peters Seed Research breeding programme.	52
Russian	Oblate pink fruit, 170-340g each. RL, indeterminate, midseason.		519
Russian Persimmon	Plant produces 4-8 oz orange fruit with sweet flavour. Very productive plant. Determinate, regular leaf, 80 days.	From Russia.	143
Russian Rose	300g pink fruit, seem to be variable in size. RL, indeterminate, 80 days.	An heirloom from a unknown Russian family from Novorossiyyk that maintain it for years. 1996.	521
Russian Saskatchewan	Compact, dwarf plants produce good harvests of red, spherical fruit. Rugose RL, determinate, 60 days.	An old heirloom variety that has been grown by Darlene MacMillan's family for many years in Colfax, Saskatchewan and originally came from Russia.	292
Saint Pierre	All that's available on this one is that it has an oblate shape, is bi- or tri-coloured (red/orange/yellow) and that it's late maturing.	Originally from France, given to a collector in Alberta in 1966, then donated to PGRC in 1974.	178
Saljut (Salyut)	Red plum type. RL, determinate.	Russian commercial variety.	522

Variety Name	Growth Info	Historical Info	Accession #
Salt Spring Sunrise	Bushy small plant, produces small red slicers. 3-4' plants. Good taste. Good for costal locations. Determinate.	Developed by the late P.J. (Jack) James, agricultural consultant of Salt Spring Island, British Columbia, Canada, in the 1950-60s.	202
San Francisco Fog	Tomato specially bred fro cool, wet climates. Red globular, 2-3" in diameter, 2-4oz fruit. Plants grow 7-8ft, slightly more acidic than sweet taste, vigorous production, good resistance to BER and splitting. Regular leaf. Indeterminate, 80 days.		54
Sasha's Altai (Sasha's Pride)	Round, red globular fruit, very flavourful and good for fresh eating and preservation. Fruit sets in cooler climates easily. Indeterminate. Regular leaf. 60 days.	Russian heirloom from the Altai Mountains. For full history see here: http://www.seedstrust.com/st/sasha.html	55
Schappis Künsachter Alpenglühn	Plants produce flattened and fluted 2-4oz red fruit. Strong flavour, more acidic than sweet. Prolific bloomer. RL, indeterminate, early season.	Originally from Austria, dates at least to the early 1960/61.	285
Schlesische Himbeere	Pink fruit oblate, beefsteak type fruit. Nice sweet, complex flavour. Grew moderately well even in a very bad year. Plants up to about 5'. Regular, somewhat wispy leaves. 80 days. Indeterminate.	German commercial variety. Name translates to English as Silesian raspberry.	342
Scoresby Dwarf	Compact plants, growing between 2-2.5 ft. Red fruit, approx 85-100g each. Cupped regular foliage. Determinate. 75 days.		343
Scotland Yellow	Sturdy vigorous plant with golden yellow, golf ball sized fruit produced in trusses. Early producing, soft skin, and a sweet/tangy flavour.	Sourced by L. Gaffney from the HSL, with no notes provided from HSL as to origins.	335
Scr 5	A late maturing red oblate fruit, regular leaf.	Collected from the Canary Islands of Spain in 1986 and given to PGRC.	177
Severnaya Korona (Northern Crown)	Red (sometimes pink?), heartshaped meaty fruits, approx 280g each. Fruit can display a wide range of sizes of irregular oblate to heart shaped. RL, indeterminate, mid season.	Russian commercial variety.	485
Shaker Village	Pink heavily ribbed fruit. RL, indeterminate.	From Canterbury Village, NH, USA.	523
Shapka Monomakha	Indet., wispy looking plants with regular foliage produce pink heart-shaped fruits, some with a pointed tip, 6-12 oz, very meaty and sweet. 70 days.	Russian commercial variety. Named after the crown worn by Russian Tsar's. Literal translation is "Monomakha's Hat", but more correct translation would be Monomakh's Cap, or "The Crown of Monomakh".	344

Variety Name	Growth Info	Historical Info	Accession #
Sherkhan	Dwarf plants produce long, sausage shaped fruit, red with orange striping. Very dry flesh and few seeds. 3-6oz each. Good acidic flavour. Good cooking tomato. Regular leaf. Determinate.	Russian commercial variety, vended by CV Gavrish. Introduced commercially to North America by Tatiana's TomatoBase. Name means "Shere Khan" in Russian, referencing the tiger in "The Jungle Book" by Rudyard Kipling.	279
Shokoladnyi (Wokoladnyj, Chocolate, Russian Chocolate)	Plant produces excellent yields of 4-12oz black/reddish fruit. Some green shouldering, smokey rich flavour, resistant to cracking and BER. 70-80 days. Indeterminate, regular leaf.	Russian commercial var., introduced to NA by Andrey Baranovski of Minsk, Belarus in the late 2000s as Russian Chocolate.	90
Shuntukski Velikan	Ind. RL. Large, pink oblate beefsteak-type fruit. 12-16oz. Meaty fruit with lots of seeds. Early for such a large-fruited variety. Very productive. Reliable producer in cooler areas.	"Velikan" means Giant from Russian. Possibly originates from Shuntut, Russia.	190
Sibirskiy Velikan Rozovyi	Ind. RL. Large, pink oblate beefsteak-type fruit. 12-16oz. Meaty fruit with lots of seeds. Early for such a large-fruited variety. Very productive. Reliable producer in cooler and warmer areas. 80 days.	From Siberia. Translates to "Siberian Giant Pink" from Russian.	189
Sicilian Saucer	Large, ribbed, very irregular shape, very good flavour, few seeds, excellent for sauces and preservation. Fruit up to 1lb. Regular leaf. Indeterminate. 85 days.	Family heirloom from Italy that has been passed around by Mr. Cook, from Mississauga. Mr. Cook received the seed from his Sicilian neighbor who has had it in his family for generations. First listed in SSE in 2008.	56
Silvery Fir Tree (Serebristaya El, Carrot-Like)	Extremely hearty plant, about 2ft high. Has carrot like delicate foliage. Excellent production in a range of temperatures, it's not abnormal for me to get 10+ lbs from this little plant. Red oblate fruit, first of the season are larger (about 3-4" in diameter) while the rest are smaller (2-3" in diameter). Fruit weighs about 8oz each. Does well in heat and as much sun as possible, but also produces well in rainier or colder seasons. Perfect for slicing, but does make a great sauce. Determinate. 68 days.	Traditional Russian variety attributed to Moscow seedswoman Marina Danilenko, brought to US by SSE in early 1990s.	126
Siniy	Compact plants, purple/black flattened irregular fruit, 140-340g each. Early production, determinate or semi-determinate. PL.	Variety originated in the former USSR (possibly Estonia).	524
Sirius	Early determinate variety. Large plants, red spherical fruit. Regular leaf.	Donated to PGRC in 1985.	311
Slava	Red smaller fruit. Potato leaf. Early, indeterminate.	Czech heirloom. Name means "glory" in Czech.	525
Slavic Masterpiece	4-8 oz red round meaty fruit. Vigorous 6ft+ plants. Good resistance to splits. Good taste, good acid/sweet balance. Indeterminate, 75 days.	Russian commercial open-pollinated tomato, introduced to North American by Andrey Baranovski of Minsk, Belarus under the translated name.	57

Variety Name	Growth Info	Historical Info	Accession #
Snow White	Light yellow cherry-type tomato. Crack resistant. Strong, tall vines, require good staking. Very good yields. Indeterminate. Regular leaf. 65 days.	Developed by Joe Bratka of New Jersey.	231
Sojourner South American	Medium to large pink fruit, irregular and variable in shape - from plum to heart. Sweet flavour. RL, indeterminate. Late.	Reportedly originally from Brazil.	526
Sophie's Choice	Miniature tomato, grows about 1 - 1.5ft high at the most. Excellent producer for its size. First fruit of the season is quite large at about 3-4" in diameter, while the remaining fruit will be closer to 2. Good balance between meat and juice, excellent slicer and for fresh eating. Good well-rounded tomato flavour. Regular leaf. 60 days. Determinate.	A family heirloom from Edmonton in Alberta, Canada. Barry Comden of California offered this variety to Carolyn Male. It had no name, and Barry said that a friend of his in California had gotten it from someone in Edmonton, Canada. Carolyn asked Barry to name it and he deferred to his Californian friend who named it Sophie's Choice.	128
Sorrento			527
Spark's Yellow	Large, yellow-orange beefsteak type fruit, approximately 500g each. Good flavour. PL, indeterminate, 85+ days.	Sent to Craig LeHoullier by Don Sparks (KY SP D) in 1993 with name "Yellow" and described as a regular leaf variety. Craig found it to be a large pale orange colored oblate tomato on a potato leaf plant, and renamed it Spark's Yellow in honor of Don Sparks.	528
Spoon	Small, 0.5-2g red fruit. Large sprawling plant.		529
Spudatula Black (Black From Tula Potato Leaf)	Purple/black fruit with green shoulders, 170-340g each. PL, indeterminate, midseason.	Discovered by Darrel Jones on his farm in Alabama. Darrel found 3 potato leaf seedlings when he grew Black from Tula seed from the packet purchased from Chuck Wyatt (Heirloom Tomatoes) in 2002. All the other plants grown from the same seed packet were regular leaf. Darrel thought the potato leaf variant was an excellent tomato, and in 2005 he shared some seeds with Bill Malin of Hillsboro, New Mexico, who had been collecting potato leaf tomatoes. Bill Malin grew it out and offered as Spudatula Black.	530
Sputnik	Plants produce medium sized brown beefsteak fruit, 4-10oz each with good flavour. RL, indeterminate. 80 days.	First offered in the Seed Savers 1996 Yearbook by Arche Noah, a genetic preservation organization in Austria (AUST AR N), who got the seeds from Elmar Dolgener. Seeds originally from the USSR. Named after the Russian satellite launched in 1957.	283
Stokes Green	Green-yellow beefsteaks-type fruit, good flavour, approx 170-300g each. Juicy. RL, indeterminate, midseason.	First offered in the Seed Savers 1998 Yearbook by Dorothy Beiswenger, Crookston, Minnesota (MN BE D), who said this variety came from James Stokes.	531
Stoney Mountain			532

Striped Cavern (Red Cavern, Schimmeig Stoo, Lobed and Striped)	Stuffing tomato. Blocky, bell-pepper type shape. Red and orange striped. Moderate yields, moderate flavour, best used as a stuffing tomato or for salsa. Crack resistant. Regular leaf. Indeterminate. 80 days.	Bred by Thomas P. Wagner of Tater Mater Seeds	233
Striped Stuffer	80 days. Blocky, semihollow fruit - red with yellow stripes. 7 oz in weight. Indeterminate.		182
Stump of the World	Irregular pink beefsteak type fruit, 300-500g each. Moderate to good yields. Indeterminate, PL, late season (90 days).		533
Stupice	Early variety, compact plant, grows to around 4ft. Red globular tomatoes, wonderful flavour, sweet with a good acid balance. Potato-leafed. Always the first to appear and extremely productive in my garden. Indeterminate. 60 days.	Heirloom from Czechoslovakia.	58
Sub Arctic Maxi	Plant produces red, smooth uniform fruit, globular shape. Approx. 2-5oz each, 2" in diameter. Good acidic tomato taste. Somewhat susceptible to blight. 65 days. Determinate. Regular leaf.	Developed by Dr. Harris at the Beaverlodge Res. Sta., Alberta, Canada. Released to the public in 1976.	208
Summer Cider	Yellow orange/peach skin with creamy flesh. Sweet fruity flavour. Fruit measures up to 1.5lbs, but is more commonly 10oz. Good flavour, early maturation for large variety. 75 days.	Bred by Tom Wagner of Everett, WA, USA. Originally called 'Apple Butter' by Everett.	273
Sunset's Red Horizon	Plant produces medium to large heart shaped fruit - 6-14 oz. Meaty, not juicy, flesh. Excellent balanced flavour. Regular leaf. Indeterminate. Mid-season.	Original seed stock is from 'Rostova', an heirloom to Russia. It was first offered by TomatoFest, but a cross happened some years back and instead of the beefsteak shape of Rustova, Sunset's Red Horizon became heart shaped. It is now considered a separate variety.	137
Sylvan Guame	Large, hearty plant, grows extremely well even in adverse conditions. Large red non-uniform red fruit, beefsteak shaped, 1-2lbs. Excellent flavour, very meaty and juicy with very few seeds. A great all around tomato. 80 days. Regular leaf. Indeterminate.	This tomato was named after a 80 year old man in Canada who shared the seeds and indicated that this variety came from Russia. Its original Russian name is not known.	124
Table Jewel			534
Tamina	Round red fruit, potato leaf. Indeterminate, early.		535
Tangerine (Big Orange)	Large orange beefsteak fruit, bright orange in colour (hence the name). Good flavour and few seeds. Fruit weighs 1-2lbs each. Indeterminate. Regular leaf. 75 d		7

Tartar From Mongolstan	Tolerant of hot, cool, or humid climates. Good production of red-orange fruit slightly oblate in shape. Regular leaf. 70 days.	?	260
Taxi	Small to medium sized plant, produces medium sized beefsteak-type yellow tomatoes. Determinate. Regular leaf. 70 days.	Possibly developed by Johnny's Selected Seeds - but that is unverified.	78
Tecumseh	Fusarium resistance. Susceptible to TMV. Late maturity, heavy fruit set. Indeterminate.	Developed at Purdue University, Lafayette, IN, USA. Donated to USDA 1959.	156
Tennessee Surprise	Large, orange/yellow bicoloured fruit, large plants easily getting over 6 ft. Indeterminate, RL, late (85+ days)	Found by Tennessee road crew workers in the garden of an elderly lady who had grown it as long as she could remember.	537
Teta de Monja	Heart shaped pink fruit, wispy plant, with good fruit set.	Spanish for 'Nun's Breast'	251
Than			538
The Dutchman (Dutchman)	Large pink oblate fruits, slightly ribbed. Sweet flavour, 8-16 oz each. Good taste, few seeds. RL, indeterminate, 80 days.	Family heirloom introduced by Merlin W. Gleckler of Gleckler's Seedmen in 1958.	392
Thessaloniki	Plant produces uniform red globular fruit, excellent earthy/balanced/acidic flavour. Resists sun scald and cracking. Regular leaf. Indeterminate. 75 days.	Originally from Greece and introduced by Gleckler's Seedmen in the 1950's.	138
Tidlig Bush	Early, determinate. Marbled(?). Flat fruit shape. Smallish plant.	From Norway - Tidlig means "Early". Donated to PGRC from Alberta in 1974.	306
Tigerella (Mr. Stripey)	4oz fruit, 2" in diameter. Skin is red with yellow-green streaks. Flesh is red-orange and quite tangy/tart. Regular leaf. Indeterminate, 76 days.	A cross of Ailsa Craig with an unknown variety. Bred by Glasshouse Research Institute in England in the 1930's.	59
Tiny Tiger	Dwarf plant reaching about 1.5 ft, faint orange and red striping cherry fruit. Determinate, RL, 75 days.		539
Tiny Tim	Dwarf tomato plant, reaches a maximum of 12" high. Can be grown in an 8" pot. Yields small braids of 3/4" red, round, cherry tomatoes. Regular leaf. Determinate. 50 days.	Developed by University of New Hampshire, Durham in 1945. Parantage: Window Box x Red Currant.	60
Titan	Smooth red regular fruit, 30-50g each. Will display green shouldering that disappears when ripe. Determinate, RL, early.	Non-commercial variety from Russia.	540
Tlacolula Ribbed	Heavily pleated fruit, about 3" in diameter. Shade, heat, drought tolerant. Mild flavour, hollow. Red in colour. RL, indeterminate. 80-85 days.	Heirloom from Oaxaca, Mexico. Said to be unchanged and grown for generations in the Tlacolula region.	61

Tobolsk	Bright yellow irregular fruit.RL, indeterminate, 75 days.	Said to be an old Russian heirloom from Tobolsk, Siberia, Russia.	541
Tomadose Des Comores	Cherry-type red round fruit, may have blight resistance. RL, indeterminate, midseason.	An heirloom cherry tomato from France, named after The Comoros islands as the name suggests. 'Tomadose' means 'cherry tomato', and 'Comores' is a French name of the Comoros Islands, situated off the coast of Africa, which is used to be a French controlled territory, with the island of Mayotte still part of France.	542
Tomate	Early and heavy fruit set of small to medium sized dark red fruit. Extreme fasciation. Oblate shape. Regular leaf.	Originally purchased in the Market at Tarma, Peru. Elevation: 3048 meters. Donated to USDA in 1932.	159
Tonnelet	Egg shaped 30-50g fruit, red with yellow/orange striping. Plant grows tall. RL, indeterminate, midseason.	From Belgium	543
Tozabu Tylaut (Bulgarian Tozabu Tylaut)	Pink 350-450g beefsteak type fruit. Productive. RL, indeterminate, 80 days.	Originally from Bulgaria.	545
Tozala Egpu (Bulgarian Tozala Egpu)	Strong bushy plants with good foliage cover. 250-400g beefsteak type fruit with some ruffling at the shoulders. RL, indeterminate.	Originally from Bulgaria.	544
Tribes Tobique	Nice round, red fruit, very good producer. Regular leaf, nice flavour. 75 days.		580
Tri Tolstyaka	Pink, flattened oblate fruit approximately 150-300g each.RL, indeterminate.	Russian commercial variety, named after the book by Yury Olesha, ?Three Fat Men?	546
Tsygan (Zigan, Gypsy)	4-6oz black fruit. Vigorous 6ft+ plants. Smokey flavour more acid than sweet, meaty, good saucer. Rare in North America. Regular leaf. Indeterminate, 80 days.	Russian commercial variety, introduced to North America by Andrey Baranovski, Minsk Belarus in the early 2000s under its translated name, Gypsy	62
Turks Muts (Turk Mutz, Turks Mutz)	Irregular shaped brown fruit, slightly ribbed and oblate. 120-300g each. PL, indeterminate, 80 days.	Dutch name translates to 'Turkish Turban'.	547

Val's Black Striped	Plant produces small round brown/black fruits with dark green striping. Meaty and firm fruit. 2 seed cavities filled with gel, large seeds. Good canner. RL, indeterminate, mid-season.	A mutation found in a group of 'Sascha's Altai' tomatoes in Dan & Val McMurray's tomato patch in 2005. Discovered by B.C KO T in 2009. Is stable. Named for Val McMurray.	281
Valencia	Plant produces round, orange fruit with good flavour. 3-6oz each. Regular leaf. Indeterminate. 80 days.	A selection from Sunray (which was a selection from Jubilee) from the 1940s.	261
Valiant	Good production of 140-280g round red fruit, slightly irregular. RL, indeterminate, 80 days.	Bred by Francis C. Stokes Co., Vincetown, NJ, released in the Stokes catalogue in 1937.	553
Vandenbargs Moneyrna	Plant produces very uniform globular shaped 2" red fruit. Indeterminate. Regular leaf. 72 days.	Original seed donated to PGRC from Ontario, Canada in 1983.	122
Variegated (Splash of Cream)	Produced globe-shaped red 2" fruit, inclusters of 5-6. Strong sprawling habit. Plant leaves are variegated green and light green. Indeterminate. Regular leaf. 80 days.	Introduced to North America by Greg Speichert of IN who received seeds from Ed Rasmussen, who had received his seeds from France. Variety has been shown to be grown in Ireland and the British Isles previous to France.	226
Victoria	Semideterminate/indeterminate plant, block red 7 oz fruit. Early production. Good taste and texture. Potato leaf.		203
Victorian Dwarf			554
Vilms	Red, plum fruit.		555
Violet Jasper (Tzi Bi U)	Produces 2oz globe-shaped fruit, dark pink with green striping. Good flavour. Regular leaf. Indeterminate. 80 days.	First offered at Seed Savers 2009 Yearbook by Hristo Hristov of Bulgaria (BULG HR H) as Tzi Bi U.	227
Vorlon	Large, indetermine plant that requires good steaking to hold the 10-18oz fruit off the ground. Deep brown/black fruit, with some green shouldering. Excellent flavour and high yields. Indeterminate, 75-80 days, potato leaf.	Stabilized accidental cross of Cherokee Purple x Pruden's Purple. Named after the race of aliens on Babylon 5.	80
Waltinger's Fleisch aus Indien	Small round brown fruit, good flavour. 1-2oz each. Very good flavour. Some green shouldering. RL, indeterminate, 80 days.	First offered in the Seed Savers 2000 Yearbook by Seed Savers Heritage Farm, Decorah, Iowa (IA SSE HF), who acquired the seeds for this tomato and for other tomatoes of 'Waltingers' series from Nancy Arrowsmith of Austria (AUST AR N, later AZ AR N, as Mrs. Arrowsmith moved to Arizona).	282
Wapsipinicon Peach	Small, ping pong sized fruit, yellow with a slight fuzz over the skin. Vigorous plants. Very sweet, low acidity. Regular leafed. Indeterminate, 80 days.	Originally came from Dennis Schlicht and was named after the Wapsipinicon river in Iowa.	64
Warner's Yellow			571

Weeping Charley	Medium sized red fruit. Slightly roma/plum/elongated in shape with a tip on the blossom end. Others are rounder. Regular leaf. Indeterminate.		82
Weissbehaarte	Ind. prolific, large plant (can grow up to 12' high). High yield of small light yellow round fruit, 1-2 oz, 2" wide. Mild, sweet flavour with a thick skin. Good for stuffing. 80 days.	Old German variety. Rare in North America.	195
Wendy			556
Wisconsin 55 Gold	Golden orange 200-300g fruit, round or slightly oblate with some slight ruffling at the shoulders. RL, indeterminate.	A gold fruited sport of Wisconsin 55, found in 1953-54 and maintained for a half a century by Dr. Raabe, a professor emeritus at UC Berkeley.	558
Wladeck's	Large plants, require good staking. Light red to pink fruit(?). Irregular.	Originally brought from Poland after WWII by Wladeck Neitzgoda, and named after him.	559
Wonder Lights (Plum Lemon)	Plant produces 2-4oz lemon shaped bright yellow fruit. Meaty, mild, and sweet flavour. Regular leaf. Indeterminate. 75 days.	Russian heirloom. Seed was collected from an old seedsman in Moscow, Russia.	66
World's Wonder Red			560
Xu Xu	Elongated plum-shaped fruit, compact plant. RL, determinate.	Originally from Portugal	561
Yaponskiy Krab (Japanese Crab)	Large, pink beefsteak-type fruit. Juicy with good flavour, best for fresh eating. Regular leaf, indeterminate.	Russian commercial variety, introduced commercially in North America in 2009 by Tatiana's Tomatobase.	439
Yasha Yugoslavian	Pink heart shaped fruit, approximately 450g each. Wispy foliage, good production. RL, indeterminate, 80-85 days.	Originated from one of Carolyn Male's former colleagues, Yasha Crnkovic.	570
Yates Beefsteak (Beefsteak, Yates)	Oblate red fruit, 85-190g each. RL, indeterminate.		562
Yellow Jumbo Heirloom	300-500g light orange fruit. RL, indeterminate, 85 days.		563
Yellow Lemon	Yellow globular fruit, sweet and juicy. 2-4oz fruit. Regular leaf. Indeterminate, 85 days.	Originally Collected from Karaj, Iran in January 1943 and donated to USDA in May 1943.	67
Yellow Pear	RL, indeterminate plant. 4-5ft in height. Produces HUGE amounts of small yellow pear shaped cherry tomatoes. Really nice acidity, nice flavour. The only cherry I grow. Produces in bunches of 6-10 fruit per. 75 days. Heat, drought, humidity tolerant.	Very old heirloom variety, first described in 1805 by Persoon. Goes back to the 17th century.	68
Yellow Perfection	Bright yellow 1-1.5" round thin-skinned fruit. Has a tendency to crack if overripe or overwatered. Potato leaf. Indeterminate 75 days.	Commercial heirloom from a British seed company. Dates back to 1890's.	69

Yellow Ruffled	75-80 days, RL, indet., plant. Produces heavily ruffled lemon yellow fruit, 8-10oz each. Sweet flavour, not hollow, little bit of acidity. Good prod. In hot weather. 80 days.	First offered in SSE, no other information currently available.	70
Yellow Submarine	Reportedly improved form of 'Yellow Pear', but growers do not notice much difference. 15-20g yellow pear shaped fruit. PL, indeterminate, 80 days.	Seeds for this variety were introduced in the USA by Bill Malin of New Mexico (SpudleafWillie, NM MA W) in the mid-2000s. Bill Malin received seeds in trade from the Organic Centre of Ireland.	564
Zapotec Pink Pleated (Zapotec, Zapotec Pink, Zapotec Pleated)	Large, pink heavily ribbed fruit, potentially the origin of all modern beefsteaks. Semi-hollow insides, excellent very distinct flavour. Regular leafed plant, extremely vigorous vines with sparse leaves. Indeterminate, 85 days	Heirloom from Oaxaca, Mexico, said to be originally grown by the Zapotec people.	71
Zefhen Long			565
Zhuan Kong Kiao			567
Zloty Ozarowski	Orange globe shaped fruits. RL, indeterminate, early(?)	Polish variety, vended by CV PNOS Ozarow Mazowiecki, Poland. Name translates to "golden Ozarowski" in Polish.	572
Zogola	Large ruffled irregular oblate fruit, 250-550 g red fruit. RL, indeterminate, 85 days.	Polish heirloom.	573
Zoloty Kupola	Ind. compact plant, RL wispy foliage. Heart shaped fruit. Yellow, sometimes with pinkish streaks, 8-20oz. Good flavour. Very few seeds.	Name translates as 'Golden Domes' from Russian. Russian commercial variety, developed in Siberia. Introduced to North America by Andrey Baranovski, Belarus.	192
Zomok			568
Zomu	Small determinate plant. Good production of 2-4 oz round red fruit. Good flavour with no BER or splitting. 70 days. Rugose leaf. Determinate	Might be a possible misspelling of 'Zomuk'.	146
Zore's Big Red	Red heart shaped meaty fruit, approximately 450g each. PL, indeterminate, late (90 days).	Originally from Yugoslavia.	569

Common Name Watermelon

<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Moon & Stars	Large fruiting variety - reportedly up to 40 lbs, but more likely in the 5lb range (especially in a shorter season). Dark green rind with yellow smaller dots and larger dots (hence moon and stars). Very sweet and juicy flesh. Can be grown in a slightly shorter season with coverage. 95 days.	Originally introduced by Peter Henderson & Co. in 1926, it was called "SUN, MOON AND STARS."	303

Common Name Zucchini			
<i>Variety Name</i>	<i>Growth Info</i>	<i>Historical Info</i>	<i>Accession #</i>
Cocozelle	Bush-type zucchini, excellent for really small spaces or large containers (half-wine barrel). Fruit is dark green with light green/grey vertical striping. Good mild flavour, almost nutty undertones. 50 days.	Italian heirloom variety.	141
Fordhook			339
